CBSE Previous Year Practice 2018 (2018)

Subject: General | Topic: Artificial Intelligence

1. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 84)

2. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 74)

3. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 358)

4. Which option is a correct use case for A* search in Artificial Intelligence? (variation 353)

5. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 354)

6. Which statement best describes intelligent agents in Artificial Intelligence? (variation 80)

7. Which statement best describes intelligent agents in Artificial Intelligence? (variation 350)

8. When working with Artificial Intelligence, why would a developer use state space search?

9. Which statement best describes intelligent agents in Artificial Intelligence? (variation 90)

10. When working with Artificial Intelligence, why would a developer use state space search? (variation 91)

11. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 109)

12. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 94)

13. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 359)

14. When working with Artificial Intelligence, why would a developer use planning? (variation 356)

15. Which statement best describes natural language processing in Artificial Intelligence? (variation 75)

16. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 89)

17. When working with Artificial Intelligence, why would a developer use planning? (variation 96)

18. What is the most accurate beginner-level explanation of heuristics?

19. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 88)

20. Which statement best describes intelligent agents in Artificial Intelligence? (variation 70)

21. What is the most accurate beginner-level explanation of expert systems? (variation 77)

22. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 78)

23. What is the most accurate beginner-level explanation of expert systems? (variation 107)

24. A student says 'knowledge representation' is not relevant to real projects. What is the best correction?

25. What is the most accurate beginner-level explanation of expert systems? (variation 97)

26. When working with Artificial Intelligence, why would a developer use planning? (variation 106)

27. What is the most accurate beginner-level explanation of heuristics? (variation 352)

28. Which statement best describes intelligent agents in Artificial Intelligence? (variation 100)

29. When working with Artificial Intelligence, why would a developer use planning? (variation 86)

30. Which statement best describes natural language processing in Artificial Intelligence? (variation 95)

31. What is the most accurate beginner-level explanation of heuristics? (variation 102)

32. When working with Artificial Intelligence, why would a developer use state space search? (variation 101)

33. What is the most accurate beginner-level explanation of expert systems? (variation 357)

34. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 79)

35. What is the most accurate beginner-level explanation of expert systems? (variation 87)

36. When working with Artificial Intelligence, why would a developer use planning?

37. What is the most accurate beginner-level explanation of expert systems?

38. When working with Artificial Intelligence, why would a developer use state space search? (variation 71)

39. Which option is a correct use case for A* search in Artificial Intelligence?

40. Which option is a correct use case for A* search in Artificial Intelligence? (variation 83)

41. Which option is a correct use case for A* search in Artificial Intelligence? (variation 93)

42. What is the most accurate beginner-level explanation of heuristics? (variation 82)

43. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 98)

44. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 108)

45. When working with Artificial Intelligence, why would a developer use state space search? (variation 351)

46. When working with Artificial Intelligence, why would a developer use planning? (variation 76)

47. When working with Artificial Intelligence, why would a developer use state space search? (variation 81)

48. A student says 'large language models' is not relevant to real projects. What is the best correction?

49. Which statement best describes intelligent agents in Artificial Intelligence?

50. Which statement best describes natural language processing in Artificial Intelligence? (variation 85)

51. What is the most accurate beginner-level explanation of heuristics? (variation 72)

52. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 104)

53. Which option is a correct use case for A* search in Artificial Intelligence? (variation 73)

54. What is the most accurate beginner-level explanation of heuristics? (variation 92)

55. Which statement best describes natural language processing in Artificial Intelligence? (variation 105)

56. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 99)

57. Which statement best describes natural language processing in Artificial Intelligence? (variation 355)

58. Which option is a correct use case for reinforcement learning in Artificial Intelligence?

59. Which statement best describes natural language processing in Artificial Intelligence?

60. Which option is a correct use case for A* search in Artificial Intelligence? (variation 103)
