NEET Previous Year Practice 2025 (2025)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

2. What is the most accurate beginner-level explanation of malloc? (variation 352)

3. Which statement best describes the stack in C Programming? (variation 85)

4. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

5. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

6. Which option is a correct use case for structs in C Programming? (variation 93)

7. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

8. Which option is a correct use case for structs in C Programming? (variation 83)

9. When working with C Programming, why would a developer use null terminator? (variation 76)

10. Which statement best describes the stack in C Programming?

11. Which statement best describes the stack in C Programming? (variation 355)

12. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

13. A student says 'header files' is not relevant to real projects. What is the best correction?

14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

15. When working with C Programming, why would a developer use null terminator? (variation 96)

16. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

17. What is the most accurate beginner-level explanation of pass by pointer?

18. Which statement best describes the stack in C Programming? (variation 105)

19. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

20. When working with C Programming, why would a developer use arrays? (variation 101)

21. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

22. Which option is a correct use case for structs in C Programming? (variation 353)

23. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

24. Which statement best describes pointers in C Programming? (variation 100)

25. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

26. Which statement best describes the stack in C Programming? (variation 95)

27. When working with C Programming, why would a developer use null terminator? (variation 86)

28. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

29. What is the most accurate beginner-level explanation of malloc? (variation 82)

30. Which option is a correct use case for structs in C Programming?

31. When working with C Programming, why would a developer use arrays? (variation 351)

32. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

33. Which option is a correct use case for preprocessor macros in C Programming?

34. Which statement best describes pointers in C Programming? (variation 90)

35. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

36. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

37. Which option is a correct use case for structs in C Programming? (variation 103)

38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

39. Which statement best describes the stack in C Programming? (variation 75)

40. What is the most accurate beginner-level explanation of malloc? (variation 72)

41. Which option is a correct use case for structs in C Programming? (variation 73)

42. When working with C Programming, why would a developer use arrays?

43. Which statement best describes pointers in C Programming?

44. What is the most accurate beginner-level explanation of malloc? (variation 102)

45. Which statement best describes pointers in C Programming? (variation 80)

46. What is the most accurate beginner-level explanation of malloc?

47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

48. When working with C Programming, why would a developer use arrays? (variation 91)

49. When working with C Programming, why would a developer use null terminator? (variation 356)

50. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

51. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

52. When working with C Programming, why would a developer use null terminator? (variation 106)

53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

54. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

55. When working with C Programming, why would a developer use arrays? (variation 81)

56. When working with C Programming, why would a developer use arrays? (variation 71)

57. Which statement best describes pointers in C Programming? (variation 70)

58. What is the most accurate beginner-level explanation of malloc? (variation 92)

59. When working with C Programming, why would a developer use null terminator?

60. Which statement best describes pointers in C Programming? (variation 350)
