IIT-JEE Previous Year Practice 2025 (2025)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

2. Which statement best describes the stack in C Programming? (variation 75)

3. When working with C Programming, why would a developer use arrays? (variation 91)

4. What is the most accurate beginner-level explanation of malloc?

5. Which option is a correct use case for structs in C Programming? (variation 83)

6. Which option is a correct use case for structs in C Programming? (variation 93)

7. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

8. Which statement best describes the stack in C Programming? (variation 355)

9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

10. What is the most accurate beginner-level explanation of malloc? (variation 352)

11. What is the most accurate beginner-level explanation of malloc? (variation 72)

12. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

13. When working with C Programming, why would a developer use null terminator? (variation 76)

14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

15. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

16. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

17. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

18. When working with C Programming, why would a developer use arrays? (variation 101)

19. Which option is a correct use case for preprocessor macros in C Programming?

20. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

21. Which statement best describes pointers in C Programming? (variation 100)

22. A student says 'header files' is not relevant to real projects. What is the best correction?

23. Which statement best describes the stack in C Programming? (variation 95)

24. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

25. When working with C Programming, why would a developer use arrays?

26. What is the most accurate beginner-level explanation of malloc? (variation 92)

27. Which option is a correct use case for structs in C Programming?

28. What is the most accurate beginner-level explanation of malloc? (variation 102)

29. Which statement best describes the stack in C Programming?

30. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

31. Which statement best describes pointers in C Programming? (variation 80)

32. When working with C Programming, why would a developer use null terminator? (variation 86)

33. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

34. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

35. When working with C Programming, why would a developer use arrays? (variation 351)

36. Which option is a correct use case for structs in C Programming? (variation 73)

37. What is the most accurate beginner-level explanation of malloc? (variation 82)

38. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

39. When working with C Programming, why would a developer use null terminator? (variation 96)

40. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

41. When working with C Programming, why would a developer use null terminator?

42. When working with C Programming, why would a developer use arrays? (variation 81)

43. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

44. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

45. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

46. Which option is a correct use case for structs in C Programming? (variation 353)

47. When working with C Programming, why would a developer use null terminator? (variation 106)

48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

49. Which statement best describes pointers in C Programming? (variation 350)

50. Which statement best describes pointers in C Programming?

51. Which statement best describes pointers in C Programming? (variation 70)

52. Which statement best describes the stack in C Programming? (variation 85)

53. Which statement best describes the stack in C Programming? (variation 105)

54. When working with C Programming, why would a developer use null terminator? (variation 356)

55. When working with C Programming, why would a developer use arrays? (variation 71)

56. What is the most accurate beginner-level explanation of pass by pointer?

57. Which statement best describes pointers in C Programming? (variation 90)

58. Which option is a correct use case for structs in C Programming? (variation 103)

59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
