# ICSE Previous Year Practice 2022 (2022)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes hash tables in Data Structures & Algorithms?

2. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

3. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

4. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

5. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

6. What is the most accurate beginner-level explanation of linked lists? (variation 92)

7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

8. Which statement best describes Big O notation in Data Structures & Algorithms?

9. When working with Data Structures & Algorithms, why would a developer use binary search?

10. What is the most accurate beginner-level explanation of linked lists? (variation 82)

11. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

12. When working with Data Structures & Algorithms, why would a developer use binary trees?

13. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

14. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

15. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

16. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

18. What is the most accurate beginner-level explanation of linked lists?

19. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

20. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

21. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

22. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

23. Which statement best describes hash tables in Data Structures & Algorithms?

24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

26. What is the most accurate beginner-level explanation of linked lists? (variation 92)

27. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

28. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

29. Which statement best describes hash tables in Data Structures & Algorithms?

30. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

31. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

32. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

33. What is the most accurate beginner-level explanation of linked lists? (variation 102)

34. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

35. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

36. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

37. When working with Data Structures & Algorithms, why would a developer use binary search?

38. A student says 'queues' is not relevant to real projects. What is the best correction?

39. When working with Data Structures & Algorithms, why would a developer use binary search?

40. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

41. What is the most accurate beginner-level explanation of recursion? (variation 97)

42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

43. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

44. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

45. What is the most accurate beginner-level explanation of linked lists? (variation 92)

46. What is the most accurate beginner-level explanation of recursion?

47. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

48. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

49. When working with Data Structures & Algorithms, why would a developer use binary trees?

50. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

51. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

52. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

54. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

55. Which statement best describes Big O notation in Data Structures & Algorithms?

56. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

57. What is the most accurate beginner-level explanation of linked lists? (variation 72)

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

59. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

60. What is the most accurate beginner-level explanation of linked lists? (variation 102)
