CBSE Previous Year Practice 2017 (2017)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems?

2. A student says 'mutexes' is not relevant to real projects. What is the best correction?

3. Which statement best describes processes in Operating Systems?

4. Which statement best describes file systems in Operating Systems? (variation 95)

5. A student says 'paging' is not relevant to real projects. What is the best correction?

6. Which statement best describes processes in Operating Systems? (variation 70)

7. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

8. When working with Operating Systems, why would a developer use system calls? (variation 96)

9. Which statement best describes processes in Operating Systems? (variation 100)

10. What is the most accurate beginner-level explanation of deadlocks?

11. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

12. When working with Operating Systems, why would a developer use system calls? (variation 86)

13. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

14. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

15. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

16. What is the most accurate beginner-level explanation of context switching? (variation 72)

17. What is the most accurate beginner-level explanation of context switching? (variation 92)

18. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

19. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

20. What is the most accurate beginner-level explanation of context switching? (variation 352)

21. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

22. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

23. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

24. When working with Operating Systems, why would a developer use threads? (variation 351)

25. Which option is a correct use case for virtual memory in Operating Systems?

26. Which statement best describes processes in Operating Systems? (variation 80)

27. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

28. Which statement best describes file systems in Operating Systems? (variation 105)

29. What is the most accurate beginner-level explanation of context switching? (variation 102)

30. When working with Operating Systems, why would a developer use threads? (variation 71)

31. When working with Operating Systems, why would a developer use threads? (variation 91)

32. Which statement best describes file systems in Operating Systems? (variation 75)

33. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

34. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

35. Which statement best describes file systems in Operating Systems?

36. When working with Operating Systems, why would a developer use threads? (variation 101)

37. Which statement best describes file systems in Operating Systems? (variation 355)

38. Which statement best describes processes in Operating Systems? (variation 350)

39. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

40. When working with Operating Systems, why would a developer use threads? (variation 81)

41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

42. When working with Operating Systems, why would a developer use threads?

43. When working with Operating Systems, why would a developer use system calls? (variation 356)

44. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

45. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

46. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

47. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

48. When working with Operating Systems, why would a developer use system calls? (variation 76)

49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

50. What is the most accurate beginner-level explanation of context switching?

51. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

52. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

53. When working with Operating Systems, why would a developer use system calls?

54. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

55. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

56. When working with Operating Systems, why would a developer use system calls? (variation 106)

57. Which statement best describes file systems in Operating Systems? (variation 85)

58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

59. Which statement best describes processes in Operating Systems? (variation 90)

60. What is the most accurate beginner-level explanation of context switching? (variation 82)
