State Board Previous Year Practice 2021 (2021)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

2. What is the most accurate beginner-level explanation of linked lists? (variation 82)

3. When working with Data Structures & Algorithms, why would a developer use binary trees?

4. When working with Data Structures & Algorithms, why would a developer use binary search?

5. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

6. What is the most accurate beginner-level explanation of linked lists? (variation 92)

7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

8. Which statement best describes Big O notation in Data Structures & Algorithms?

9. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

10. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

11. When working with Data Structures & Algorithms, why would a developer use binary search?

12. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

13. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

14. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

15. What is the most accurate beginner-level explanation of linked lists? (variation 102)

16. Which option is a correct use case for merge sort in Data Structures & Algorithms?

17. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

18. When working with Data Structures & Algorithms, why would a developer use binary trees?

19. What is the most accurate beginner-level explanation of recursion? (variation 107)

20. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

21. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

22. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

23. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

24. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

25. What is the most accurate beginner-level explanation of recursion? (variation 87)

26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

27. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

29. What is the most accurate beginner-level explanation of linked lists?

30. A student says 'queues' is not relevant to real projects. What is the best correction?

31. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

32. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

34. Which statement best describes hash tables in Data Structures & Algorithms?

35. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

36. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

37. What is the most accurate beginner-level explanation of recursion?

38. Which option is a correct use case for stacks in Data Structures & Algorithms?

39. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

40. What is the most accurate beginner-level explanation of recursion? (variation 97)

41. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

42. A student says 'queues' is not relevant to real projects. What is the best correction?

43. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

44. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

45. What is the most accurate beginner-level explanation of linked lists?

46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

47. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

48. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

49. Which statement best describes hash tables in Data Structures & Algorithms?

50. What is the most accurate beginner-level explanation of recursion? (variation 77)

51. What is the most accurate beginner-level explanation of recursion?

52. What is the most accurate beginner-level explanation of linked lists? (variation 72)

53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

54. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

55. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

56. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

58. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

59. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

60. What is the most accurate beginner-level explanation of recursion? (variation 97)
