University Exams Previous Year Practice 2022 (2022)

Subject: General | Topic: Operating Systems

1. Which statement best describes processes in Operating Systems? (variation 100)

2. When working with Operating Systems, why would a developer use threads?

3. Which statement best describes file systems in Operating Systems? (variation 75)

4. Which option is a correct use case for virtual memory in Operating Systems?

5. What is the most accurate beginner-level explanation of context switching? (variation 102)

6. What is the most accurate beginner-level explanation of context switching? (variation 72)

7. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

8. When working with Operating Systems, why would a developer use system calls? (variation 106)

9. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

10. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

11. What is the most accurate beginner-level explanation of deadlocks?

12. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

13. When working with Operating Systems, why would a developer use threads? (variation 91)

14. When working with Operating Systems, why would a developer use system calls?

15. When working with Operating Systems, why would a developer use system calls? (variation 76)

16. Which statement best describes processes in Operating Systems? (variation 70)

17. When working with Operating Systems, why would a developer use threads? (variation 101)

18. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

19. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

20. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

21. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

22. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

23. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

24. When working with Operating Systems, why would a developer use system calls? (variation 86)

25. When working with Operating Systems, why would a developer use threads? (variation 81)

26. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

27. Which statement best describes file systems in Operating Systems? (variation 85)

28. Which statement best describes processes in Operating Systems? (variation 350)

29. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

30. When working with Operating Systems, why would a developer use threads? (variation 351)

31. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

32. Which statement best describes file systems in Operating Systems? (variation 105)

33. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

34. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

35. A student says 'mutexes' is not relevant to real projects. What is the best correction?

36. What is the most accurate beginner-level explanation of context switching? (variation 92)

37. What is the most accurate beginner-level explanation of context switching? (variation 352)

38. When working with Operating Systems, why would a developer use system calls? (variation 356)

39. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

40. Which statement best describes processes in Operating Systems? (variation 90)

41. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

42. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

43. When working with Operating Systems, why would a developer use system calls? (variation 96)

44. Which statement best describes file systems in Operating Systems? (variation 95)

45. Which statement best describes processes in Operating Systems?

46. Which statement best describes file systems in Operating Systems?

47. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

48. When working with Operating Systems, why would a developer use threads? (variation 71)

49. What is the most accurate beginner-level explanation of context switching?

50. Which statement best describes processes in Operating Systems? (variation 80)

51. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

52. A student says 'paging' is not relevant to real projects. What is the best correction?

53. What is the most accurate beginner-level explanation of context switching? (variation 82)

54. Which option is a correct use case for scheduling in Operating Systems?

55. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

56. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

57. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

59. Which statement best describes file systems in Operating Systems? (variation 355)

60. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
