ICSE Previous Year Practice 2023 (2023)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 92)

2. What is the most accurate beginner-level explanation of linked lists? (variation 92)

3. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

4. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

5. What is the most accurate beginner-level explanation of linked lists? (variation 72)

6. What is the most accurate beginner-level explanation of recursion? (variation 97)

7. What is the most accurate beginner-level explanation of recursion? (variation 107)

8. What is the most accurate beginner-level explanation of recursion?

9. Which option is a correct use case for merge sort in Data Structures & Algorithms?

10. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

11. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

12. When working with Data Structures & Algorithms, why would a developer use binary trees?

13. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

14. What is the most accurate beginner-level explanation of linked lists? (variation 72)

15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

16. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

19. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

20. Which statement best describes hash tables in Data Structures & Algorithms?

21. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

22. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

23. What is the most accurate beginner-level explanation of linked lists? (variation 102)

24. When working with Data Structures & Algorithms, why would a developer use binary search?

25. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

26. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

27. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

28. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

29. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

30. Which statement best describes hash tables in Data Structures & Algorithms?

31. What is the most accurate beginner-level explanation of recursion? (variation 97)

32. What is the most accurate beginner-level explanation of linked lists?

33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

34. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

35. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

36. When working with Data Structures & Algorithms, why would a developer use binary search?

37. When working with Data Structures & Algorithms, why would a developer use binary search?

38. Which statement best describes Big O notation in Data Structures & Algorithms?

39. What is the most accurate beginner-level explanation of linked lists? (variation 82)

40. A student says 'queues' is not relevant to real projects. What is the best correction?

41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

42. What is the most accurate beginner-level explanation of linked lists?

43. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

44. What is the most accurate beginner-level explanation of linked lists? (variation 92)

45. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

46. What is the most accurate beginner-level explanation of linked lists?

47. What is the most accurate beginner-level explanation of recursion? (variation 77)

48. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

49. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

51. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

52. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

54. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

55. What is the most accurate beginner-level explanation of recursion?

56. What is the most accurate beginner-level explanation of linked lists? (variation 82)

57. What is the most accurate beginner-level explanation of recursion?

58. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

59. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

60. Which statement best describes hash tables in Data Structures & Algorithms?
