University Exams Previous Year Practice 2020 (2020)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion?

2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

3. What is the most accurate beginner-level explanation of linked lists? (variation 92)

4. What is the most accurate beginner-level explanation of linked lists? (variation 92)

5. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

6. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

7. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

9. What is the most accurate beginner-level explanation of linked lists? (variation 92)

10. What is the most accurate beginner-level explanation of recursion? (variation 77)

11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

13. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

14. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

15. What is the most accurate beginner-level explanation of linked lists? (variation 72)

16. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

18. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

19. What is the most accurate beginner-level explanation of linked lists? (variation 102)

20. What is the most accurate beginner-level explanation of linked lists? (variation 82)

21. Which statement best describes Big O notation in Data Structures & Algorithms?

22. When working with Data Structures & Algorithms, why would a developer use binary search?

23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

26. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

27. What is the most accurate beginner-level explanation of recursion? (variation 107)

28. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

29. Which statement best describes hash tables in Data Structures & Algorithms?

30. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

31. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

32. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

33. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

34. Which statement best describes hash tables in Data Structures & Algorithms?

35. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

36. When working with Data Structures & Algorithms, why would a developer use binary search?

37. What is the most accurate beginner-level explanation of recursion?

38. What is the most accurate beginner-level explanation of recursion?

39. What is the most accurate beginner-level explanation of recursion? (variation 97)

40. Which option is a correct use case for merge sort in Data Structures & Algorithms?

41. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

42. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

43. What is the most accurate beginner-level explanation of linked lists?

44. A student says 'queues' is not relevant to real projects. What is the best correction?

45. When working with Data Structures & Algorithms, why would a developer use binary trees?

46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

47. Which statement best describes Big O notation in Data Structures & Algorithms?

48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

51. What is the most accurate beginner-level explanation of linked lists?

52. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

53. When working with Data Structures & Algorithms, why would a developer use binary trees?

54. When working with Data Structures & Algorithms, why would a developer use binary search?

55. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

57. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

58. When working with Data Structures & Algorithms, why would a developer use binary search?

59. What is the most accurate beginner-level explanation of recursion? (variation 87)

60. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
