State Board Previous Year Practice 2026 (2026)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of context switching?

2. When working with Operating Systems, why would a developer use system calls? (variation 356)

3. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

4. Which statement best describes processes in Operating Systems? (variation 100)

5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

6. Which statement best describes file systems in Operating Systems? (variation 355)

7. When working with Operating Systems, why would a developer use system calls? (variation 106)

8. What is the most accurate beginner-level explanation of context switching? (variation 352)

9. Which statement best describes file systems in Operating Systems? (variation 105)

10. Which option is a correct use case for virtual memory in Operating Systems?

11. Which statement best describes processes in Operating Systems? (variation 90)

12. Which statement best describes processes in Operating Systems?

13. What is the most accurate beginner-level explanation of context switching? (variation 72)

14. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

15. What is the most accurate beginner-level explanation of context switching? (variation 82)

16. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

17. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

18. When working with Operating Systems, why would a developer use threads? (variation 351)

19. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

20. When working with Operating Systems, why would a developer use threads? (variation 91)

21. Which statement best describes file systems in Operating Systems? (variation 85)

22. Which option is a correct use case for scheduling in Operating Systems?

23. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

24. Which statement best describes file systems in Operating Systems? (variation 75)

25. When working with Operating Systems, why would a developer use system calls? (variation 96)

26. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

27. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

28. What is the most accurate beginner-level explanation of context switching? (variation 92)

29. Which statement best describes processes in Operating Systems? (variation 80)

30. When working with Operating Systems, why would a developer use system calls? (variation 76)

31. Which statement best describes file systems in Operating Systems? (variation 95)

32. Which statement best describes processes in Operating Systems? (variation 350)

33. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

34. When working with Operating Systems, why would a developer use threads?

35. A student says 'mutexes' is not relevant to real projects. What is the best correction?

36. When working with Operating Systems, why would a developer use system calls? (variation 86)

37. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

38. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

39. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

40. A student says 'paging' is not relevant to real projects. What is the best correction?

41. Which statement best describes processes in Operating Systems? (variation 70)

42. When working with Operating Systems, why would a developer use system calls?

43. When working with Operating Systems, why would a developer use threads? (variation 81)

44. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

45. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

46. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

48. What is the most accurate beginner-level explanation of deadlocks?

49. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

50. Which statement best describes file systems in Operating Systems?

51. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

52. When working with Operating Systems, why would a developer use threads? (variation 101)

53. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

54. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

55. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

56. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

57. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

58. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

59. What is the most accurate beginner-level explanation of context switching? (variation 102)

60. When working with Operating Systems, why would a developer use threads? (variation 71)
