CBSE Previous Year Practice 2021 (2021)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'queues' is not relevant to real projects. What is the best correction?

2. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

4. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

5. What is the most accurate beginner-level explanation of linked lists? (variation 82)

6. What is the most accurate beginner-level explanation of recursion? (variation 77)

7. What is the most accurate beginner-level explanation of linked lists? (variation 72)

8. What is the most accurate beginner-level explanation of recursion?

9. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

10. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

11. What is the most accurate beginner-level explanation of recursion?

12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

13. Which option is a correct use case for stacks in Data Structures & Algorithms?

14. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

15. What is the most accurate beginner-level explanation of linked lists? (variation 102)

16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

17. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

18. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

19. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

20. What is the most accurate beginner-level explanation of linked lists?

21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

22. Which statement best describes Big O notation in Data Structures & Algorithms?

23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

24. What is the most accurate beginner-level explanation of recursion? (variation 97)

25. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

27. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

28. When working with Data Structures & Algorithms, why would a developer use binary trees?

29. A student says 'queues' is not relevant to real projects. What is the best correction?

30. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

31. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

32. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

35. When working with Data Structures & Algorithms, why would a developer use binary search?

36. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

37. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

39. Which statement best describes hash tables in Data Structures & Algorithms?

40. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

41. What is the most accurate beginner-level explanation of linked lists? (variation 72)

42. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

43. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

44. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

45. What is the most accurate beginner-level explanation of linked lists? (variation 92)

46. When working with Data Structures & Algorithms, why would a developer use binary search?

47. Which statement best describes Big O notation in Data Structures & Algorithms?

48. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

49. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

50. What is the most accurate beginner-level explanation of recursion? (variation 97)

51. What is the most accurate beginner-level explanation of linked lists?

52. What is the most accurate beginner-level explanation of linked lists? (variation 92)

53. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

54. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

55. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

56. What is the most accurate beginner-level explanation of linked lists?

57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

58. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

59. When working with Data Structures & Algorithms, why would a developer use binary search?

60. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
