IIT-JEE Previous Year Practice 2020 (2020)

Subject: General | Topic: Operating Systems

1. Which statement best describes processes in Operating Systems?

2. What is the most accurate beginner-level explanation of context switching? (variation 92)

3. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

4. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

6. What is the most accurate beginner-level explanation of context switching? (variation 102)

7. When working with Operating Systems, why would a developer use threads?

8. When working with Operating Systems, why would a developer use threads? (variation 71)

9. Which statement best describes processes in Operating Systems? (variation 350)

10. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

11. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

12. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

13. Which statement best describes file systems in Operating Systems? (variation 105)

14. When working with Operating Systems, why would a developer use system calls? (variation 356)

15. When working with Operating Systems, why would a developer use system calls? (variation 96)

16. Which statement best describes processes in Operating Systems? (variation 100)

17. Which statement best describes file systems in Operating Systems? (variation 95)

18. A student says 'paging' is not relevant to real projects. What is the best correction?

19. What is the most accurate beginner-level explanation of context switching?

20. What is the most accurate beginner-level explanation of context switching? (variation 352)

21. What is the most accurate beginner-level explanation of context switching? (variation 82)

22. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

23. When working with Operating Systems, why would a developer use system calls? (variation 106)

24. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

25. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

26. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

27. When working with Operating Systems, why would a developer use system calls? (variation 76)

28. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

29. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

30. When working with Operating Systems, why would a developer use threads? (variation 91)

31. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

32. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

33. Which statement best describes file systems in Operating Systems?

34. A student says 'mutexes' is not relevant to real projects. What is the best correction?

35. Which statement best describes processes in Operating Systems? (variation 90)

36. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

37. What is the most accurate beginner-level explanation of context switching? (variation 72)

38. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

39. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

40. When working with Operating Systems, why would a developer use threads? (variation 351)

41. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

42. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

43. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

44. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

45. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

46. Which statement best describes file systems in Operating Systems? (variation 355)

47. When working with Operating Systems, why would a developer use system calls? (variation 86)

48. When working with Operating Systems, why would a developer use system calls?

49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

50. Which option is a correct use case for virtual memory in Operating Systems?

51. Which statement best describes processes in Operating Systems? (variation 70)

52. When working with Operating Systems, why would a developer use threads? (variation 101)

53. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

54. Which statement best describes processes in Operating Systems? (variation 80)

55. When working with Operating Systems, why would a developer use threads? (variation 81)

56. Which option is a correct use case for scheduling in Operating Systems?

57. Which statement best describes file systems in Operating Systems? (variation 85)

58. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

59. Which statement best describes file systems in Operating Systems? (variation 75)

60. What is the most accurate beginner-level explanation of deadlocks?
