ICSE Previous Year Practice 2020 (2020)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists?

2. Which statement best describes hash tables in Data Structures & Algorithms?

3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

4. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

5. When working with Data Structures & Algorithms, why would a developer use binary search?

6. When working with Data Structures & Algorithms, why would a developer use binary search?

7. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

8. Which statement best describes hash tables in Data Structures & Algorithms?

9. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

13. What is the most accurate beginner-level explanation of recursion?

14. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

15. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

16. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

17. What is the most accurate beginner-level explanation of linked lists? (variation 102)

18. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

19. What is the most accurate beginner-level explanation of recursion? (variation 107)

20. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

22. Which option is a correct use case for stacks in Data Structures & Algorithms?

23. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

24. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

25. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

26. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

27. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

28. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

29. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

31. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

32. What is the most accurate beginner-level explanation of linked lists?

33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

35. A student says 'queues' is not relevant to real projects. What is the best correction?

36. Which statement best describes Big O notation in Data Structures & Algorithms?

37. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

38. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

39. What is the most accurate beginner-level explanation of linked lists? (variation 82)

40. What is the most accurate beginner-level explanation of linked lists? (variation 72)

41. What is the most accurate beginner-level explanation of linked lists? (variation 82)

42. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

43. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

44. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

45. What is the most accurate beginner-level explanation of linked lists? (variation 102)

46. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

47. What is the most accurate beginner-level explanation of linked lists? (variation 92)

48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

50. What is the most accurate beginner-level explanation of recursion? (variation 77)

51. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

52. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

53. Which option is a correct use case for merge sort in Data Structures & Algorithms?

54. Which option is a correct use case for merge sort in Data Structures & Algorithms?

55. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

56. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

58. Which statement best describes Big O notation in Data Structures & Algorithms?

59. What is the most accurate beginner-level explanation of recursion?

60. What is the most accurate beginner-level explanation of recursion? (variation 97)
