IIT-JEE Previous Year Practice 2025 (2025)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

2. Which statement best describes hash tables in Data Structures & Algorithms?

3. When working with Data Structures & Algorithms, why would a developer use binary trees?

4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

5. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

6. What is the most accurate beginner-level explanation of linked lists?

7. What is the most accurate beginner-level explanation of linked lists? (variation 102)

8. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

9. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

10. Which statement best describes Big O notation in Data Structures & Algorithms?

11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

12. What is the most accurate beginner-level explanation of recursion?

13. What is the most accurate beginner-level explanation of recursion? (variation 77)

14. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

16. Which option is a correct use case for stacks in Data Structures & Algorithms?

17. What is the most accurate beginner-level explanation of recursion? (variation 97)

18. Which statement best describes hash tables in Data Structures & Algorithms?

19. A student says 'queues' is not relevant to real projects. What is the best correction?

20. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

21. What is the most accurate beginner-level explanation of linked lists? (variation 72)

22. When working with Data Structures & Algorithms, why would a developer use binary search?

23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

25. What is the most accurate beginner-level explanation of recursion? (variation 107)

26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

27. Which option is a correct use case for merge sort in Data Structures & Algorithms?

28. When working with Data Structures & Algorithms, why would a developer use binary search?

29. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

31. What is the most accurate beginner-level explanation of recursion? (variation 97)

32. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

33. What is the most accurate beginner-level explanation of linked lists? (variation 82)

34. What is the most accurate beginner-level explanation of linked lists? (variation 102)

35. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

36. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

37. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

38. Which option is a correct use case for merge sort in Data Structures & Algorithms?

39. What is the most accurate beginner-level explanation of recursion?

40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

43. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

44. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

45. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

46. Which statement best describes hash tables in Data Structures & Algorithms?

47. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

48. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

49. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

50. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

51. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

52. What is the most accurate beginner-level explanation of linked lists? (variation 92)

53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

55. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

56. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

58. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

59. What is the most accurate beginner-level explanation of linked lists?

60. What is the most accurate beginner-level explanation of linked lists? (variation 92)
