# CBSE Previous Year Practice 2018 (2018)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

2. When working with C Programming, why would a developer use null terminator?

3. Which option is a correct use case for structs in C Programming?

4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

5. When working with C Programming, why would a developer use arrays? (variation 91)

6. What is the most accurate beginner-level explanation of malloc? (variation 72)

7. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

8. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

10. When working with C Programming, why would a developer use arrays?

11. Which option is a correct use case for preprocessor macros in C Programming?

12. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

13. Which option is a correct use case for structs in C Programming? (variation 83)

14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

15. When working with C Programming, why would a developer use null terminator? (variation 106)

16. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

17. Which option is a correct use case for structs in C Programming? (variation 73)

18. Which option is a correct use case for structs in C Programming? (variation 353)

19. What is the most accurate beginner-level explanation of malloc? (variation 352)

20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

22. When working with C Programming, why would a developer use arrays? (variation 101)

23. What is the most accurate beginner-level explanation of pass by pointer?

24. What is the most accurate beginner-level explanation of malloc? (variation 82)

25. Which statement best describes pointers in C Programming?

26. When working with C Programming, why would a developer use null terminator? (variation 76)

27. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

28. When working with C Programming, why would a developer use arrays? (variation 71)

29. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

30. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

31. Which statement best describes the stack in C Programming? (variation 355)

32. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

33. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

34. Which option is a correct use case for structs in C Programming? (variation 93)

35. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

36. Which statement best describes the stack in C Programming? (variation 85)

37. Which statement best describes the stack in C Programming? (variation 75)

38. What is the most accurate beginner-level explanation of malloc? (variation 92)

39. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

40. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

41. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

42. Which statement best describes pointers in C Programming? (variation 90)

43. Which option is a correct use case for structs in C Programming? (variation 103)

44. Which statement best describes pointers in C Programming? (variation 70)

45. Which statement best describes the stack in C Programming?

46. When working with C Programming, why would a developer use arrays? (variation 351)

47. When working with C Programming, why would a developer use null terminator? (variation 86)

48. What is the most accurate beginner-level explanation of malloc?

49. Which statement best describes pointers in C Programming? (variation 100)

50. When working with C Programming, why would a developer use null terminator? (variation 96)

51. Which statement best describes the stack in C Programming? (variation 105)

52. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

53. Which statement best describes pointers in C Programming? (variation 350)

54. When working with C Programming, why would a developer use null terminator? (variation 356)

55. What is the most accurate beginner-level explanation of malloc? (variation 102)

56. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

57. When working with C Programming, why would a developer use arrays? (variation 81)

58. A student says 'header files' is not relevant to real projects. What is the best correction?

59. Which statement best describes pointers in C Programming? (variation 80)

60. Which statement best describes the stack in C Programming? (variation 95)
