CBSE Previous Year Practice 2024 (2024)

Subject: General | Topic: Operating Systems

1. Which statement best describes processes in Operating Systems?

2. What is the most accurate beginner-level explanation of context switching? (variation 92)

3. What is the most accurate beginner-level explanation of context switching?

4. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

5. When working with Operating Systems, why would a developer use system calls? (variation 356)

6. Which statement best describes processes in Operating Systems? (variation 70)

7. Which statement best describes processes in Operating Systems? (variation 90)

8. Which statement best describes file systems in Operating Systems? (variation 75)

9. When working with Operating Systems, why would a developer use system calls? (variation 96)

10. What is the most accurate beginner-level explanation of context switching? (variation 72)

11. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

12. What is the most accurate beginner-level explanation of context switching? (variation 352)

13. Which option is a correct use case for virtual memory in Operating Systems?

14. When working with Operating Systems, why would a developer use system calls? (variation 76)

15. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

16. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

17. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

18. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

19. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

20. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

21. When working with Operating Systems, why would a developer use threads? (variation 91)

22. A student says 'mutexes' is not relevant to real projects. What is the best correction?

23. Which statement best describes processes in Operating Systems? (variation 80)

24. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

25. When working with Operating Systems, why would a developer use threads?

26. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

27. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

28. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

29. What is the most accurate beginner-level explanation of context switching? (variation 102)

30. Which statement best describes processes in Operating Systems? (variation 350)

31. When working with Operating Systems, why would a developer use threads? (variation 101)

32. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

33. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

34. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

35. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

36. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

37. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

38. When working with Operating Systems, why would a developer use threads? (variation 81)

39. When working with Operating Systems, why would a developer use threads? (variation 351)

40. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

41. Which statement best describes file systems in Operating Systems?

42. Which statement best describes file systems in Operating Systems? (variation 95)

43. What is the most accurate beginner-level explanation of context switching? (variation 82)

44. When working with Operating Systems, why would a developer use threads? (variation 71)

45. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

49. Which statement best describes file systems in Operating Systems? (variation 355)

50. Which option is a correct use case for scheduling in Operating Systems?

51. When working with Operating Systems, why would a developer use system calls? (variation 106)

52. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

53. A student says 'paging' is not relevant to real projects. What is the best correction?

54. Which statement best describes file systems in Operating Systems? (variation 105)

55. When working with Operating Systems, why would a developer use system calls? (variation 86)

56. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

57. What is the most accurate beginner-level explanation of deadlocks?

58. When working with Operating Systems, why would a developer use system calls?

59. Which statement best describes file systems in Operating Systems? (variation 85)

60. Which statement best describes processes in Operating Systems? (variation 100)
