UPSC Previous Year Practice 2019 (2019)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

3. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

4. What is the most accurate beginner-level explanation of linked lists? (variation 82)

5. Which statement best describes Big O notation in Data Structures & Algorithms?

6. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

7. What is the most accurate beginner-level explanation of recursion? (variation 97)

8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

9. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

10. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

11. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

12. A student says 'queues' is not relevant to real projects. What is the best correction?

13. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

14. What is the most accurate beginner-level explanation of recursion? (variation 87)

15. What is the most accurate beginner-level explanation of linked lists? (variation 92)

16. When working with Data Structures & Algorithms, why would a developer use binary search?

17. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

18. What is the most accurate beginner-level explanation of recursion? (variation 97)

19. What is the most accurate beginner-level explanation of linked lists?

20. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

21. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

22. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

25. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

26. What is the most accurate beginner-level explanation of linked lists? (variation 82)

27. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

29. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

31. What is the most accurate beginner-level explanation of linked lists? (variation 102)

32. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

33. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

34. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

35. Which statement best describes hash tables in Data Structures & Algorithms?

36. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

37. When working with Data Structures & Algorithms, why would a developer use binary search?

38. When working with Data Structures & Algorithms, why would a developer use binary trees?

39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

40. What is the most accurate beginner-level explanation of linked lists?

41. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

42. What is the most accurate beginner-level explanation of linked lists? (variation 102)

43. When working with Data Structures & Algorithms, why would a developer use binary search?

44. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

45. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

46. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

47. What is the most accurate beginner-level explanation of linked lists? (variation 102)

48. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

50. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

51. What is the most accurate beginner-level explanation of linked lists?

52. What is the most accurate beginner-level explanation of linked lists? (variation 72)

53. When working with Data Structures & Algorithms, why would a developer use binary search?

54. A student says 'queues' is not relevant to real projects. What is the best correction?

55. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

56. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

57. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

58. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

59. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

60. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
