State Board Previous Year Practice 2023 (2023)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use threads? (variation 351)

2. When working with Operating Systems, why would a developer use system calls? (variation 356)

3. When working with Operating Systems, why would a developer use threads? (variation 71)

4. Which statement best describes processes in Operating Systems? (variation 70)

5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

6. Which statement best describes processes in Operating Systems? (variation 100)

7. Which statement best describes file systems in Operating Systems?

8. What is the most accurate beginner-level explanation of context switching? (variation 102)

9. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

10. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

11. When working with Operating Systems, why would a developer use threads? (variation 101)

12. Which statement best describes processes in Operating Systems? (variation 90)

13. Which statement best describes file systems in Operating Systems? (variation 105)

14. When working with Operating Systems, why would a developer use system calls? (variation 106)

15. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

16. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

17. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

18. Which option is a correct use case for virtual memory in Operating Systems?

19. When working with Operating Systems, why would a developer use system calls?

20. Which statement best describes processes in Operating Systems? (variation 80)

21. What is the most accurate beginner-level explanation of context switching? (variation 72)

22. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

23. Which option is a correct use case for scheduling in Operating Systems?

24. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

25. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

26. When working with Operating Systems, why would a developer use threads? (variation 81)

27. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

28. What is the most accurate beginner-level explanation of context switching? (variation 92)

29. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

30. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

31. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

32. What is the most accurate beginner-level explanation of context switching? (variation 352)

33. What is the most accurate beginner-level explanation of context switching? (variation 82)

34. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

35. Which statement best describes file systems in Operating Systems? (variation 95)

36. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

37. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

38. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

39. When working with Operating Systems, why would a developer use system calls? (variation 76)

40. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

42. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

43. A student says 'paging' is not relevant to real projects. What is the best correction?

44. When working with Operating Systems, why would a developer use threads?

45. What is the most accurate beginner-level explanation of context switching?

46. A student says 'mutexes' is not relevant to real projects. What is the best correction?

47. Which statement best describes processes in Operating Systems? (variation 350)

48. Which statement best describes file systems in Operating Systems? (variation 85)

49. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

50. Which statement best describes processes in Operating Systems?

51. What is the most accurate beginner-level explanation of deadlocks?

52. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

53. Which statement best describes file systems in Operating Systems? (variation 355)

54. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

55. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

56. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

57. When working with Operating Systems, why would a developer use system calls? (variation 96)

58. When working with Operating Systems, why would a developer use system calls? (variation 86)

59. When working with Operating Systems, why would a developer use threads? (variation 91)

60. Which statement best describes file systems in Operating Systems? (variation 75)
