University Exams Previous Year Practice 2023 (2023)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use null terminator? (variation 86)

2. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

3. Which statement best describes the stack in C Programming?

4. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

5. Which statement best describes pointers in C Programming? (variation 100)

6. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

7. Which statement best describes the stack in C Programming? (variation 95)

8. Which option is a correct use case for structs in C Programming? (variation 83)

9. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

10. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

11. When working with C Programming, why would a developer use null terminator? (variation 106)

12. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

13. What is the most accurate beginner-level explanation of malloc? (variation 82)

14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

15. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

16. When working with C Programming, why would a developer use arrays?

17. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

18. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

19. What is the most accurate beginner-level explanation of malloc? (variation 92)

20. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

22. Which option is a correct use case for structs in C Programming? (variation 103)

23. When working with C Programming, why would a developer use arrays? (variation 81)

24. Which statement best describes the stack in C Programming? (variation 75)

25. What is the most accurate beginner-level explanation of malloc?

26. What is the most accurate beginner-level explanation of malloc? (variation 352)

27. What is the most accurate beginner-level explanation of malloc? (variation 102)

28. Which statement best describes the stack in C Programming? (variation 355)

29. When working with C Programming, why would a developer use arrays? (variation 91)

30. When working with C Programming, why would a developer use null terminator? (variation 96)

31. Which statement best describes pointers in C Programming? (variation 90)

32. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

33. Which option is a correct use case for structs in C Programming? (variation 353)

34. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

35. Which option is a correct use case for structs in C Programming? (variation 73)

36. Which statement best describes pointers in C Programming? (variation 80)

37. A student says 'header files' is not relevant to real projects. What is the best correction?

38. Which option is a correct use case for structs in C Programming? (variation 93)

39. When working with C Programming, why would a developer use arrays? (variation 71)

40. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

41. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

42. What is the most accurate beginner-level explanation of malloc? (variation 72)

43. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

44. Which statement best describes pointers in C Programming? (variation 70)

45. What is the most accurate beginner-level explanation of pass by pointer?

46. When working with C Programming, why would a developer use arrays? (variation 351)

47. When working with C Programming, why would a developer use null terminator? (variation 76)

48. Which statement best describes pointers in C Programming?

49. Which statement best describes the stack in C Programming? (variation 105)

50. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

51. Which statement best describes pointers in C Programming? (variation 350)

52. Which statement best describes the stack in C Programming? (variation 85)

53. When working with C Programming, why would a developer use null terminator? (variation 356)

54. Which option is a correct use case for preprocessor macros in C Programming?

55. When working with C Programming, why would a developer use arrays? (variation 101)

56. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

57. Which option is a correct use case for structs in C Programming?

58. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

59. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

60. When working with C Programming, why would a developer use null terminator?
