NEET Previous Year Practice 2019 (2019)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes Big O notation in Data Structures & Algorithms?

2. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

4. A student says 'queues' is not relevant to real projects. What is the best correction?

5. What is the most accurate beginner-level explanation of linked lists? (variation 92)

6. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

7. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

8. What is the most accurate beginner-level explanation of linked lists? (variation 82)

9. When working with Data Structures & Algorithms, why would a developer use binary search?

10. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

11. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

12. What is the most accurate beginner-level explanation of linked lists? (variation 102)

13. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

14. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

15. When working with Data Structures & Algorithms, why would a developer use binary search?

16. What is the most accurate beginner-level explanation of recursion?

17. When working with Data Structures & Algorithms, why would a developer use binary trees?

18. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

20. Which option is a correct use case for merge sort in Data Structures & Algorithms?

21. What is the most accurate beginner-level explanation of linked lists?

22. What is the most accurate beginner-level explanation of recursion? (variation 107)

23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

25. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

26. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

28. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

29. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

31. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

32. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

34. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

37. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

38. What is the most accurate beginner-level explanation of recursion? (variation 97)

39. Which statement best describes hash tables in Data Structures & Algorithms?

40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

42. What is the most accurate beginner-level explanation of linked lists? (variation 72)

43. What is the most accurate beginner-level explanation of linked lists? (variation 102)

44. Which statement best describes hash tables in Data Structures & Algorithms?

45. What is the most accurate beginner-level explanation of recursion?

46. What is the most accurate beginner-level explanation of recursion? (variation 87)

47. What is the most accurate beginner-level explanation of recursion? (variation 77)

48. A student says 'queues' is not relevant to real projects. What is the best correction?

49. When working with Data Structures & Algorithms, why would a developer use binary search?

50. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

51. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

52. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

53. What is the most accurate beginner-level explanation of recursion?

54. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

55. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

56. What is the most accurate beginner-level explanation of linked lists? (variation 92)

57. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

58. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

59. What is the most accurate beginner-level explanation of recursion? (variation 97)

60. What is the most accurate beginner-level explanation of linked lists?
