UPSC Previous Year Practice 2017 (2017)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc? (variation 82)

2. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

4. Which statement best describes the stack in C Programming? (variation 95)

5. Which option is a correct use case for structs in C Programming?

6. When working with C Programming, why would a developer use null terminator? (variation 96)

7. When working with C Programming, why would a developer use null terminator? (variation 76)

8. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

9. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

10. When working with C Programming, why would a developer use arrays?

11. Which option is a correct use case for structs in C Programming? (variation 73)

12. What is the most accurate beginner-level explanation of malloc? (variation 102)

13. What is the most accurate beginner-level explanation of pass by pointer?

14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

15. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

16. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

17. Which statement best describes the stack in C Programming? (variation 85)

18. Which statement best describes the stack in C Programming? (variation 355)

19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

20. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

21. Which statement best describes pointers in C Programming? (variation 90)

22. When working with C Programming, why would a developer use null terminator? (variation 86)

23. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

24. What is the most accurate beginner-level explanation of malloc? (variation 352)

25. Which statement best describes the stack in C Programming?

26. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

27. When working with C Programming, why would a developer use arrays? (variation 91)

28. Which statement best describes pointers in C Programming? (variation 100)

29. When working with C Programming, why would a developer use null terminator? (variation 106)

30. A student says 'header files' is not relevant to real projects. What is the best correction?

31. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

32. Which option is a correct use case for structs in C Programming? (variation 353)

33. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

34. Which statement best describes pointers in C Programming?

35. When working with C Programming, why would a developer use null terminator? (variation 356)

36. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

37. When working with C Programming, why would a developer use arrays? (variation 351)

38. Which statement best describes the stack in C Programming? (variation 75)

39. What is the most accurate beginner-level explanation of malloc?

40. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

41. What is the most accurate beginner-level explanation of malloc? (variation 72)

42. Which option is a correct use case for structs in C Programming? (variation 93)

43. Which statement best describes pointers in C Programming? (variation 80)

44. What is the most accurate beginner-level explanation of malloc? (variation 92)

45. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

46. Which statement best describes pointers in C Programming? (variation 350)

47. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

48. Which statement best describes the stack in C Programming? (variation 105)

49. When working with C Programming, why would a developer use arrays? (variation 81)

50. Which option is a correct use case for structs in C Programming? (variation 83)

51. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

52. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

53. When working with C Programming, why would a developer use arrays? (variation 101)

54. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

55. Which statement best describes pointers in C Programming? (variation 70)

56. When working with C Programming, why would a developer use arrays? (variation 71)

57. When working with C Programming, why would a developer use null terminator?

58. Which option is a correct use case for preprocessor macros in C Programming?

59. Which option is a correct use case for structs in C Programming? (variation 103)

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
