NEET Previous Year Practice 2017 (2017)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

2. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

3. What is the most accurate beginner-level explanation of recursion? (variation 97)

4. What is the most accurate beginner-level explanation of recursion? (variation 97)

5. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

6. What is the most accurate beginner-level explanation of linked lists? (variation 92)

7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

8. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

9. What is the most accurate beginner-level explanation of recursion? (variation 77)

10. When working with Data Structures & Algorithms, why would a developer use binary trees?

11. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

12. Which option is a correct use case for merge sort in Data Structures & Algorithms?

13. What is the most accurate beginner-level explanation of linked lists? (variation 92)

14. Which option is a correct use case for merge sort in Data Structures & Algorithms?

15. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

16. When working with Data Structures & Algorithms, why would a developer use binary search?

17. A student says 'queues' is not relevant to real projects. What is the best correction?

18. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

19. What is the most accurate beginner-level explanation of recursion?

20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

21. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

22. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

24. What is the most accurate beginner-level explanation of linked lists?

25. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

27. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

28. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

29. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

30. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

31. What is the most accurate beginner-level explanation of linked lists? (variation 92)

32. What is the most accurate beginner-level explanation of recursion?

33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

36. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

37. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

38. What is the most accurate beginner-level explanation of recursion? (variation 87)

39. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

40. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

42. What is the most accurate beginner-level explanation of linked lists? (variation 82)

43. When working with Data Structures & Algorithms, why would a developer use binary trees?

44. What is the most accurate beginner-level explanation of linked lists? (variation 102)

45. What is the most accurate beginner-level explanation of linked lists?

46. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

47. When working with Data Structures & Algorithms, why would a developer use binary search?

48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

49. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

50. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

51. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

52. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

54. Which statement best describes hash tables in Data Structures & Algorithms?

55. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

57. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

58. Which statement best describes Big O notation in Data Structures & Algorithms?

59. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

60. Which statement best describes hash tables in Data Structures & Algorithms?
