IIT-JEE Previous Year Practice 2024 (2024)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

4. What is the most accurate beginner-level explanation of recursion? (variation 97)

5. What is the most accurate beginner-level explanation of recursion? (variation 87)

6. When working with Data Structures & Algorithms, why would a developer use binary search?

7. Which option is a correct use case for merge sort in Data Structures & Algorithms?

8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

9. Which statement best describes hash tables in Data Structures & Algorithms?

10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

11. What is the most accurate beginner-level explanation of linked lists? (variation 72)

12. What is the most accurate beginner-level explanation of linked lists? (variation 72)

13. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

14. Which statement best describes hash tables in Data Structures & Algorithms?

15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

17. What is the most accurate beginner-level explanation of recursion? (variation 107)

18. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

19. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

20. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

22. What is the most accurate beginner-level explanation of linked lists? (variation 92)

23. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

25. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

26. What is the most accurate beginner-level explanation of linked lists? (variation 92)

27. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

28. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

29. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

31. What is the most accurate beginner-level explanation of linked lists? (variation 92)

32. What is the most accurate beginner-level explanation of recursion?

33. What is the most accurate beginner-level explanation of recursion? (variation 77)

34. Which statement best describes hash tables in Data Structures & Algorithms?

35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

36. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

37. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

38. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

39. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

40. Which statement best describes Big O notation in Data Structures & Algorithms?

41. When working with Data Structures & Algorithms, why would a developer use binary trees?

42. What is the most accurate beginner-level explanation of linked lists?

43. When working with Data Structures & Algorithms, why would a developer use binary search?

44. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

46. When working with Data Structures & Algorithms, why would a developer use binary search?

47. What is the most accurate beginner-level explanation of recursion? (variation 97)

48. What is the most accurate beginner-level explanation of linked lists? (variation 102)

49. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

50. What is the most accurate beginner-level explanation of linked lists? (variation 102)

51. What is the most accurate beginner-level explanation of linked lists? (variation 102)

52. When working with Data Structures & Algorithms, why would a developer use binary search?

53. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

54. Which option is a correct use case for stacks in Data Structures & Algorithms?

55. What is the most accurate beginner-level explanation of linked lists? (variation 82)

56. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

58. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

59. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

60. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
