NEET Previous Year Practice 2020 (2020)

Subject: General | Topic: Operating Systems

1. Which statement best describes file systems in Operating Systems? (variation 355)

2. What is the most accurate beginner-level explanation of context switching? (variation 352)

3. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

4. Which statement best describes file systems in Operating Systems? (variation 95)

5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

6. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

7. Which statement best describes file systems in Operating Systems? (variation 105)

8. What is the most accurate beginner-level explanation of context switching? (variation 102)

9. A student says 'mutexes' is not relevant to real projects. What is the best correction?

10. When working with Operating Systems, why would a developer use threads? (variation 81)

11. When working with Operating Systems, why would a developer use system calls? (variation 356)

12. What is the most accurate beginner-level explanation of context switching? (variation 92)

13. What is the most accurate beginner-level explanation of context switching? (variation 72)

14. Which statement best describes file systems in Operating Systems?

15. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

16. Which statement best describes file systems in Operating Systems? (variation 75)

17. When working with Operating Systems, why would a developer use system calls? (variation 96)

18. Which statement best describes processes in Operating Systems? (variation 90)

19. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

20. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

21. When working with Operating Systems, why would a developer use threads?

22. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

23. What is the most accurate beginner-level explanation of deadlocks?

24. When working with Operating Systems, why would a developer use system calls? (variation 76)

25. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

26. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

27. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

28. When working with Operating Systems, why would a developer use system calls?

29. When working with Operating Systems, why would a developer use threads? (variation 91)

30. Which statement best describes processes in Operating Systems? (variation 350)

31. A student says 'paging' is not relevant to real projects. What is the best correction?

32. When working with Operating Systems, why would a developer use threads? (variation 71)

33. Which option is a correct use case for scheduling in Operating Systems?

34. When working with Operating Systems, why would a developer use threads? (variation 101)

35. When working with Operating Systems, why would a developer use system calls? (variation 86)

36. What is the most accurate beginner-level explanation of context switching?

37. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

38. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

39. Which statement best describes processes in Operating Systems? (variation 100)

40. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

42. What is the most accurate beginner-level explanation of context switching? (variation 82)

43. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

44. Which option is a correct use case for virtual memory in Operating Systems?

45. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

46. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

47. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

49. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

50. Which statement best describes processes in Operating Systems?

51. Which statement best describes file systems in Operating Systems? (variation 85)

52. When working with Operating Systems, why would a developer use system calls? (variation 106)

53. Which statement best describes processes in Operating Systems? (variation 70)

54. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

55. Which statement best describes processes in Operating Systems? (variation 80)

56. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

57. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

59. When working with Operating Systems, why would a developer use threads? (variation 351)

60. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
