ICSE Previous Year Practice 2018 (2018)

Subject: General | Topic: SQL Database

1. What is the most accurate beginner-level explanation of INNER JOIN? (variation 72)

2. Which statement best describes SELECT in SQL Database? (variation 100)

3. A student says 'GROUP BY' is not relevant to real projects. What is the best correction? (variation 79)

4. When working with SQL Database, why would a developer use WHERE?

5. A student says 'indexes' is not relevant to real projects. What is the best correction? (variation 354)

6. When working with SQL Database, why would a developer use foreign keys? (variation 86)

7. Which option is a correct use case for transactions in SQL Database? (variation 88)

8. What is the most accurate beginner-level explanation of normalization? (variation 87)

9. A student says 'indexes' is not relevant to real projects. What is the best correction?

10. What is the most accurate beginner-level explanation of normalization? (variation 357)

11. A student says 'indexes' is not relevant to real projects. What is the best correction? (variation 74)

12. When working with SQL Database, why would a developer use WHERE? (variation 81)

13. A student says 'GROUP BY' is not relevant to real projects. What is the best correction? (variation 89)

14. Which statement best describes SELECT in SQL Database? (variation 350)

15. Which statement best describes primary keys in SQL Database? (variation 85)

16. Which option is a correct use case for LEFT JOIN in SQL Database? (variation 103)

17. A student says 'indexes' is not relevant to real projects. What is the best correction? (variation 94)

18. When working with SQL Database, why would a developer use foreign keys? (variation 106)

19. A student says 'GROUP BY' is not relevant to real projects. What is the best correction? (variation 359)

20. Which option is a correct use case for LEFT JOIN in SQL Database? (variation 353)

21. Which option is a correct use case for transactions in SQL Database?

22. Which statement best describes SELECT in SQL Database? (variation 90)

23. Which option is a correct use case for transactions in SQL Database? (variation 78)

24. When working with SQL Database, why would a developer use foreign keys? (variation 76)

25. A student says 'GROUP BY' is not relevant to real projects. What is the best correction?

26. Which option is a correct use case for LEFT JOIN in SQL Database? (variation 93)

27. What is the most accurate beginner-level explanation of INNER JOIN? (variation 102)

28. Which statement best describes primary keys in SQL Database? (variation 95)

29. What is the most accurate beginner-level explanation of INNER JOIN? (variation 92)

30. When working with SQL Database, why would a developer use foreign keys? (variation 96)

31. Which option is a correct use case for transactions in SQL Database? (variation 108)

32. When working with SQL Database, why would a developer use WHERE? (variation 351)

33. Which statement best describes primary keys in SQL Database? (variation 355)

34. When working with SQL Database, why would a developer use WHERE? (variation 91)

35. Which statement best describes primary keys in SQL Database? (variation 105)

36. What is the most accurate beginner-level explanation of normalization?

37. When working with SQL Database, why would a developer use WHERE? (variation 101)

38. Which statement best describes SELECT in SQL Database?

39. Which statement best describes SELECT in SQL Database? (variation 80)

40. What is the most accurate beginner-level explanation of INNER JOIN? (variation 82)

41. A student says 'GROUP BY' is not relevant to real projects. What is the best correction? (variation 109)

42. A student says 'indexes' is not relevant to real projects. What is the best correction? (variation 84)

43. A student says 'GROUP BY' is not relevant to real projects. What is the best correction? (variation 99)

44. When working with SQL Database, why would a developer use WHERE? (variation 71)

45. Which option is a correct use case for transactions in SQL Database? (variation 358)

46. Which option is a correct use case for transactions in SQL Database? (variation 98)

47. Which option is a correct use case for LEFT JOIN in SQL Database? (variation 83)

48. What is the most accurate beginner-level explanation of normalization? (variation 107)

49. Which statement best describes SELECT in SQL Database? (variation 70)

50. Which statement best describes primary keys in SQL Database?

51. What is the most accurate beginner-level explanation of INNER JOIN? (variation 352)

52. When working with SQL Database, why would a developer use foreign keys? (variation 356)

53. A student says 'indexes' is not relevant to real projects. What is the best correction? (variation 104)

54. What is the most accurate beginner-level explanation of INNER JOIN?

55. Which statement best describes primary keys in SQL Database? (variation 75)

56. What is the most accurate beginner-level explanation of normalization? (variation 77)

57. When working with SQL Database, why would a developer use foreign keys?

58. Which option is a correct use case for LEFT JOIN in SQL Database?

59. Which option is a correct use case for LEFT JOIN in SQL Database? (variation 73)

60. What is the most accurate beginner-level explanation of normalization? (variation 97)
