University Exams Previous Year Practice 2019 (2019)

Subject: General | Topic: Computer Networks

1. Which statement best describes IP addresses in Computer Networks? (variation 100)

2. Which option is a correct use case for latency in Computer Networks? (variation 88)

3. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 94)

4. What is the most accurate beginner-level explanation of TCP? (variation 92)

5. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 354)

6. Which option is a correct use case for latency in Computer Networks? (variation 358)

7. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 79)

8. Which option is a correct use case for UDP in Computer Networks? (variation 73)

9. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 109)

10. Which option is a correct use case for UDP in Computer Networks?

11. Which statement best describes HTTP in Computer Networks?

12. What is the most accurate beginner-level explanation of switches? (variation 97)

13. What is the most accurate beginner-level explanation of TCP? (variation 102)

14. Which statement best describes HTTP in Computer Networks? (variation 95)

15. Which option is a correct use case for latency in Computer Networks?

16. When working with Computer Networks, why would a developer use routing?

17. What is the most accurate beginner-level explanation of switches? (variation 107)

18. Which option is a correct use case for latency in Computer Networks? (variation 98)

19. Which statement best describes IP addresses in Computer Networks? (variation 80)

20. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 359)

21. Which statement best describes IP addresses in Computer Networks? (variation 350)

22. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 104)

23. Which statement best describes IP addresses in Computer Networks? (variation 90)

24. Which statement best describes IP addresses in Computer Networks? (variation 70)

25. What is the most accurate beginner-level explanation of switches?

26. What is the most accurate beginner-level explanation of switches? (variation 87)

27. Which statement best describes HTTP in Computer Networks? (variation 105)

28. When working with Computer Networks, why would a developer use routing? (variation 86)

29. What is the most accurate beginner-level explanation of switches? (variation 357)

30. Which option is a correct use case for UDP in Computer Networks? (variation 93)

31. Which statement best describes HTTP in Computer Networks? (variation 355)

32. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 74)

33. Which statement best describes HTTP in Computer Networks? (variation 85)

34. Which option is a correct use case for latency in Computer Networks? (variation 108)

35. What is the most accurate beginner-level explanation of TCP? (variation 352)

36. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 99)

37. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 89)

38. When working with Computer Networks, why would a developer use routing? (variation 76)

39. Which option is a correct use case for latency in Computer Networks? (variation 78)

40. Which option is a correct use case for UDP in Computer Networks? (variation 353)

41. When working with Computer Networks, why would a developer use routing? (variation 356)

42. Which statement best describes HTTP in Computer Networks? (variation 75)

43. When working with Computer Networks, why would a developer use subnets? (variation 91)

44. When working with Computer Networks, why would a developer use routing? (variation 106)

45. Which option is a correct use case for UDP in Computer Networks? (variation 83)

46. What is the most accurate beginner-level explanation of TCP? (variation 82)

47. What is the most accurate beginner-level explanation of TCP? (variation 72)

48. Which statement best describes IP addresses in Computer Networks?

49. When working with Computer Networks, why would a developer use routing? (variation 96)

50. When working with Computer Networks, why would a developer use subnets? (variation 71)

51. When working with Computer Networks, why would a developer use subnets? (variation 81)

52. A student says 'ports' is not relevant to real projects. What is the best correction?

53. When working with Computer Networks, why would a developer use subnets? (variation 101)

54. Which option is a correct use case for UDP in Computer Networks? (variation 103)

55. When working with Computer Networks, why would a developer use subnets? (variation 351)

56. What is the most accurate beginner-level explanation of switches? (variation 77)

57. A student says 'DNS' is not relevant to real projects. What is the best correction?

58. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 84)

59. What is the most accurate beginner-level explanation of TCP?

60. When working with Computer Networks, why would a developer use subnets?
