University Exams Previous Year Practice 2019 (2019)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion?

2. What is the most accurate beginner-level explanation of linked lists? (variation 82)

3. When working with Data Structures & Algorithms, why would a developer use binary trees?

4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

5. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

6. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

7. When working with Data Structures & Algorithms, why would a developer use binary search?

8. What is the most accurate beginner-level explanation of linked lists? (variation 82)

9. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

11. What is the most accurate beginner-level explanation of recursion?

12. When working with Data Structures & Algorithms, why would a developer use binary search?

13. Which statement best describes hash tables in Data Structures & Algorithms?

14. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

16. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

17. Which statement best describes hash tables in Data Structures & Algorithms?

18. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

19. Which option is a correct use case for stacks in Data Structures & Algorithms?

20. What is the most accurate beginner-level explanation of linked lists? (variation 72)

21. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

22. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

23. Which statement best describes hash tables in Data Structures & Algorithms?

24. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

26. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

27. Which option is a correct use case for merge sort in Data Structures & Algorithms?

28. What is the most accurate beginner-level explanation of recursion? (variation 97)

29. What is the most accurate beginner-level explanation of recursion?

30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

31. When working with Data Structures & Algorithms, why would a developer use binary search?

32. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

33. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

34. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

35. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

36. What is the most accurate beginner-level explanation of linked lists? (variation 102)

37. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

38. What is the most accurate beginner-level explanation of linked lists?

39. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

40. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

41. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

42. When working with Data Structures & Algorithms, why would a developer use binary trees?

43. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

44. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

45. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

47. What is the most accurate beginner-level explanation of recursion? (variation 77)

48. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

49. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

50. When working with Data Structures & Algorithms, why would a developer use binary search?

51. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

52. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

53. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

54. Which statement best describes Big O notation in Data Structures & Algorithms?

55. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

57. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

59. What is the most accurate beginner-level explanation of recursion? (variation 87)

60. What is the most accurate beginner-level explanation of recursion? (variation 97)
