IIT-JEE Previous Year Practice 2021 (2021)

Subject: General | Topic: Machine Learning

1. When working with Machine Learning, why would a developer use train-test split? (variation 356)

2. When working with Machine Learning, why would a developer use features? (variation 71)

3. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 84)

4. What is the most accurate beginner-level explanation of labels? (variation 352)

5. Which statement best describes overfitting in Machine Learning? (variation 355)

6. What is the most accurate beginner-level explanation of accuracy? (variation 357)

7. Which statement best describes overfitting in Machine Learning?

8. Which statement best describes overfitting in Machine Learning? (variation 105)

9. Which option is a correct use case for regression in Machine Learning? (variation 73)

10. What is the most accurate beginner-level explanation of labels? (variation 82)

11. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 94)

12. When working with Machine Learning, why would a developer use features? (variation 91)

13. Which option is a correct use case for regression in Machine Learning?

14. Which statement best describes training data in Machine Learning? (variation 100)

15. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 74)

16. Which statement best describes overfitting in Machine Learning? (variation 85)

17. Which statement best describes training data in Machine Learning?

18. Which statement best describes training data in Machine Learning? (variation 90)

19. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 89)

20. Which option is a correct use case for regression in Machine Learning? (variation 353)

21. What is the most accurate beginner-level explanation of accuracy? (variation 77)

22. Which option is a correct use case for regression in Machine Learning? (variation 103)

23. When working with Machine Learning, why would a developer use features? (variation 81)

24. When working with Machine Learning, why would a developer use train-test split? (variation 106)

25. What is the most accurate beginner-level explanation of labels? (variation 72)

26. Which statement best describes overfitting in Machine Learning? (variation 95)

27. What is the most accurate beginner-level explanation of labels?

28. When working with Machine Learning, why would a developer use features?

29. When working with Machine Learning, why would a developer use features? (variation 351)

30. What is the most accurate beginner-level explanation of accuracy? (variation 97)

31. What is the most accurate beginner-level explanation of accuracy? (variation 107)

32. Which statement best describes overfitting in Machine Learning? (variation 75)

33. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 99)

34. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 104)

35. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 354)

36. When working with Machine Learning, why would a developer use train-test split? (variation 86)

37. Which statement best describes training data in Machine Learning? (variation 80)

38. A student says 'classification' is not relevant to real projects. What is the best correction?

39. When working with Machine Learning, why would a developer use train-test split? (variation 76)

40. A student says 'gradient descent' is not relevant to real projects. What is the best correction?

41. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 109)

42. Which option is a correct use case for confusion matrix in Machine Learning? (variation 88)

43. When working with Machine Learning, why would a developer use features? (variation 101)

44. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 359)

45. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 79)

46. Which statement best describes training data in Machine Learning? (variation 70)

47. Which statement best describes training data in Machine Learning? (variation 350)

48. Which option is a correct use case for confusion matrix in Machine Learning? (variation 78)

49. Which option is a correct use case for regression in Machine Learning? (variation 83)

50. When working with Machine Learning, why would a developer use train-test split?

51. What is the most accurate beginner-level explanation of labels? (variation 92)

52. What is the most accurate beginner-level explanation of accuracy? (variation 87)

53. What is the most accurate beginner-level explanation of labels? (variation 102)

54. What is the most accurate beginner-level explanation of accuracy?

55. Which option is a correct use case for confusion matrix in Machine Learning? (variation 108)

56. Which option is a correct use case for confusion matrix in Machine Learning? (variation 98)

57. When working with Machine Learning, why would a developer use train-test split? (variation 96)

58. Which option is a correct use case for confusion matrix in Machine Learning? (variation 358)

59. Which option is a correct use case for confusion matrix in Machine Learning?

60. Which option is a correct use case for regression in Machine Learning? (variation 93)
