IIT-JEE Previous Year Practice 2018 (2018)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

3. What is the most accurate beginner-level explanation of malloc? (variation 352)

4. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

5. Which option is a correct use case for structs in C Programming? (variation 83)

6. Which statement best describes the stack in C Programming? (variation 355)

7. Which option is a correct use case for structs in C Programming?

8. Which statement best describes pointers in C Programming? (variation 350)

9. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

10. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

11. Which statement best describes pointers in C Programming? (variation 80)

12. Which statement best describes the stack in C Programming?

13. Which statement best describes the stack in C Programming? (variation 105)

14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

15. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

16. When working with C Programming, why would a developer use arrays? (variation 101)

17. When working with C Programming, why would a developer use arrays? (variation 91)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

19. Which statement best describes pointers in C Programming? (variation 70)

20. What is the most accurate beginner-level explanation of malloc? (variation 102)

21. Which statement best describes the stack in C Programming? (variation 95)

22. What is the most accurate beginner-level explanation of malloc? (variation 82)

23. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

24. What is the most accurate beginner-level explanation of pass by pointer?

25. A student says 'header files' is not relevant to real projects. What is the best correction?

26. Which option is a correct use case for structs in C Programming? (variation 353)

27. Which option is a correct use case for structs in C Programming? (variation 73)

28. When working with C Programming, why would a developer use arrays? (variation 71)

29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

31. Which statement best describes pointers in C Programming? (variation 100)

32. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

33. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

34. When working with C Programming, why would a developer use null terminator? (variation 86)

35. When working with C Programming, why would a developer use null terminator? (variation 356)

36. Which statement best describes pointers in C Programming? (variation 90)

37. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

38. Which option is a correct use case for preprocessor macros in C Programming?

39. Which statement best describes the stack in C Programming? (variation 75)

40. What is the most accurate beginner-level explanation of malloc?

41. When working with C Programming, why would a developer use arrays? (variation 81)

42. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

43. When working with C Programming, why would a developer use null terminator? (variation 96)

44. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

45. Which statement best describes pointers in C Programming?

46. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

47. When working with C Programming, why would a developer use arrays?

48. What is the most accurate beginner-level explanation of malloc? (variation 92)

49. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

50. When working with C Programming, why would a developer use null terminator? (variation 76)

51. When working with C Programming, why would a developer use null terminator?

52. When working with C Programming, why would a developer use arrays? (variation 351)

53. Which statement best describes the stack in C Programming? (variation 85)

54. When working with C Programming, why would a developer use null terminator? (variation 106)

55. Which option is a correct use case for structs in C Programming? (variation 93)

56. Which option is a correct use case for structs in C Programming? (variation 103)

57. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

58. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

59. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

60. What is the most accurate beginner-level explanation of malloc? (variation 72)
