State Board Previous Year Practice 2018 (2018)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use system calls? (variation 86)

2. Which statement best describes processes in Operating Systems? (variation 70)

3. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

4. Which option is a correct use case for scheduling in Operating Systems?

5. Which statement best describes processes in Operating Systems? (variation 350)

6. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

7. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

8. Which statement best describes file systems in Operating Systems? (variation 85)

9. What is the most accurate beginner-level explanation of context switching?

10. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

11. When working with Operating Systems, why would a developer use threads? (variation 71)

12. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

13. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

14. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

15. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

16. When working with Operating Systems, why would a developer use threads? (variation 351)

17. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

18. What is the most accurate beginner-level explanation of context switching? (variation 352)

19. When working with Operating Systems, why would a developer use system calls? (variation 96)

20. What is the most accurate beginner-level explanation of context switching? (variation 82)

21. Which statement best describes file systems in Operating Systems? (variation 95)

22. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

23. When working with Operating Systems, why would a developer use system calls? (variation 356)

24. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

25. Which statement best describes file systems in Operating Systems? (variation 355)

26. When working with Operating Systems, why would a developer use system calls?

27. When working with Operating Systems, why would a developer use threads? (variation 81)

28. Which statement best describes file systems in Operating Systems? (variation 105)

29. Which option is a correct use case for virtual memory in Operating Systems?

30. What is the most accurate beginner-level explanation of context switching? (variation 72)

31. Which statement best describes processes in Operating Systems? (variation 80)

32. A student says 'mutexes' is not relevant to real projects. What is the best correction?

33. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

34. When working with Operating Systems, why would a developer use system calls? (variation 106)

35. What is the most accurate beginner-level explanation of context switching? (variation 92)

36. Which statement best describes file systems in Operating Systems?

37. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

38. What is the most accurate beginner-level explanation of deadlocks?

39. Which statement best describes processes in Operating Systems?

40. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

41. When working with Operating Systems, why would a developer use threads?

42. Which statement best describes processes in Operating Systems? (variation 100)

43. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

44. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

45. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

46. What is the most accurate beginner-level explanation of context switching? (variation 102)

47. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

49. When working with Operating Systems, why would a developer use threads? (variation 101)

50. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

51. Which statement best describes processes in Operating Systems? (variation 90)

52. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

53. When working with Operating Systems, why would a developer use threads? (variation 91)

54. Which statement best describes file systems in Operating Systems? (variation 75)

55. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

56. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

57. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

58. A student says 'paging' is not relevant to real projects. What is the best correction?

59. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

60. When working with Operating Systems, why would a developer use system calls? (variation 76)
