UPSC Previous Year Practice 2017 (2017)

Subject: General | Topic: Computer Networks

1. What is the most accurate beginner-level explanation of switches? (variation 87)

2. Which statement best describes IP addresses in Computer Networks? (variation 70)

3. Which statement best describes IP addresses in Computer Networks? (variation 350)

4. What is the most accurate beginner-level explanation of TCP? (variation 92)

5. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 359)

6. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 354)

7. A student says 'DNS' is not relevant to real projects. What is the best correction?

8. Which option is a correct use case for latency in Computer Networks?

9. When working with Computer Networks, why would a developer use subnets? (variation 91)

10. What is the most accurate beginner-level explanation of TCP?

11. Which statement best describes IP addresses in Computer Networks? (variation 100)

12. What is the most accurate beginner-level explanation of TCP? (variation 352)

13. What is the most accurate beginner-level explanation of TCP? (variation 102)

14. A student says 'ports' is not relevant to real projects. What is the best correction?

15. When working with Computer Networks, why would a developer use subnets? (variation 101)

16. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 84)

17. Which statement best describes IP addresses in Computer Networks?

18. When working with Computer Networks, why would a developer use subnets?

19. Which option is a correct use case for UDP in Computer Networks? (variation 353)

20. What is the most accurate beginner-level explanation of switches? (variation 77)

21. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 74)

22. Which statement best describes HTTP in Computer Networks? (variation 75)

23. Which option is a correct use case for latency in Computer Networks? (variation 98)

24. Which option is a correct use case for latency in Computer Networks? (variation 88)

25. Which statement best describes HTTP in Computer Networks? (variation 355)

26. What is the most accurate beginner-level explanation of switches?

27. Which statement best describes HTTP in Computer Networks?

28. When working with Computer Networks, why would a developer use subnets? (variation 71)

29. Which statement best describes IP addresses in Computer Networks? (variation 80)

30. When working with Computer Networks, why would a developer use routing? (variation 86)

31. When working with Computer Networks, why would a developer use routing? (variation 76)

32. Which option is a correct use case for latency in Computer Networks? (variation 78)

33. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 109)

34. Which statement best describes HTTP in Computer Networks? (variation 95)

35. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 104)

36. What is the most accurate beginner-level explanation of switches? (variation 357)

37. Which statement best describes IP addresses in Computer Networks? (variation 90)

38. What is the most accurate beginner-level explanation of TCP? (variation 82)

39. Which option is a correct use case for UDP in Computer Networks? (variation 93)

40. Which option is a correct use case for UDP in Computer Networks? (variation 73)

41. When working with Computer Networks, why would a developer use routing?

42. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 79)

43. When working with Computer Networks, why would a developer use routing? (variation 356)

44. What is the most accurate beginner-level explanation of switches? (variation 107)

45. When working with Computer Networks, why would a developer use routing? (variation 96)

46. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 89)

47. Which option is a correct use case for UDP in Computer Networks?

48. When working with Computer Networks, why would a developer use subnets? (variation 81)

49. What is the most accurate beginner-level explanation of switches? (variation 97)

50. Which option is a correct use case for latency in Computer Networks? (variation 108)

51. When working with Computer Networks, why would a developer use subnets? (variation 351)

52. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 99)

53. Which option is a correct use case for UDP in Computer Networks? (variation 83)

54. Which statement best describes HTTP in Computer Networks? (variation 85)

55. Which option is a correct use case for latency in Computer Networks? (variation 358)

56. Which option is a correct use case for UDP in Computer Networks? (variation 103)

57. Which statement best describes HTTP in Computer Networks? (variation 105)

58. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 94)

59. When working with Computer Networks, why would a developer use routing? (variation 106)

60. What is the most accurate beginner-level explanation of TCP? (variation 72)
