UPSC Previous Year Practice 2021 (2021)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

2. When working with C Programming, why would a developer use arrays? (variation 91)

3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

4. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

5. Which statement best describes the stack in C Programming? (variation 85)

6. When working with C Programming, why would a developer use null terminator? (variation 96)

7. Which option is a correct use case for structs in C Programming? (variation 73)

8. When working with C Programming, why would a developer use null terminator? (variation 86)

9. Which statement best describes pointers in C Programming? (variation 90)

10. Which option is a correct use case for structs in C Programming?

11. When working with C Programming, why would a developer use null terminator? (variation 76)

12. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

13. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

15. What is the most accurate beginner-level explanation of pass by pointer?

16. Which statement best describes pointers in C Programming? (variation 80)

17. Which statement best describes pointers in C Programming? (variation 100)

18. Which statement best describes the stack in C Programming? (variation 355)

19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

20. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

21. When working with C Programming, why would a developer use arrays? (variation 71)

22. Which option is a correct use case for structs in C Programming? (variation 93)

23. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

24. Which option is a correct use case for structs in C Programming? (variation 103)

25. Which statement best describes the stack in C Programming?

26. What is the most accurate beginner-level explanation of malloc? (variation 82)

27. When working with C Programming, why would a developer use arrays?

28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

29. Which statement best describes pointers in C Programming? (variation 70)

30. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

31. Which option is a correct use case for structs in C Programming? (variation 353)

32. Which statement best describes pointers in C Programming?

33. When working with C Programming, why would a developer use null terminator? (variation 356)

34. Which option is a correct use case for structs in C Programming? (variation 83)

35. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

36. Which option is a correct use case for preprocessor macros in C Programming?

37. A student says 'header files' is not relevant to real projects. What is the best correction?

38. Which statement best describes the stack in C Programming? (variation 105)

39. When working with C Programming, why would a developer use null terminator? (variation 106)

40. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

41. What is the most accurate beginner-level explanation of malloc? (variation 352)

42. What is the most accurate beginner-level explanation of malloc? (variation 102)

43. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

44. What is the most accurate beginner-level explanation of malloc? (variation 72)

45. When working with C Programming, why would a developer use arrays? (variation 101)

46. What is the most accurate beginner-level explanation of malloc? (variation 92)

47. When working with C Programming, why would a developer use arrays? (variation 81)

48. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

49. Which statement best describes pointers in C Programming? (variation 350)

50. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

51. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

52. Which statement best describes the stack in C Programming? (variation 95)

53. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

54. Which statement best describes the stack in C Programming? (variation 75)

55. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

56. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

57. When working with C Programming, why would a developer use arrays? (variation 351)

58. When working with C Programming, why would a developer use null terminator?

59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

60. What is the most accurate beginner-level explanation of malloc?
