NEET Previous Year Practice 2021 (2021)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

2. A student says 'queues' is not relevant to real projects. What is the best correction?

3. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

4. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

5. Which statement best describes hash tables in Data Structures & Algorithms?

6. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

7. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

8. A student says 'queues' is not relevant to real projects. What is the best correction?

9. What is the most accurate beginner-level explanation of linked lists?

10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

11. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

12. Which statement best describes hash tables in Data Structures & Algorithms?

13. What is the most accurate beginner-level explanation of recursion?

14. What is the most accurate beginner-level explanation of linked lists? (variation 102)

15. What is the most accurate beginner-level explanation of linked lists? (variation 92)

16. Which statement best describes hash tables in Data Structures & Algorithms?

17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

18. What is the most accurate beginner-level explanation of linked lists?

19. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

20. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

21. What is the most accurate beginner-level explanation of linked lists? (variation 92)

22. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

23. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

24. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

25. When working with Data Structures & Algorithms, why would a developer use binary search?

26. What is the most accurate beginner-level explanation of recursion? (variation 97)

27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

28. Which option is a correct use case for stacks in Data Structures & Algorithms?

29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

31. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

32. Which option is a correct use case for merge sort in Data Structures & Algorithms?

33. What is the most accurate beginner-level explanation of recursion? (variation 97)

34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

35. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

36. What is the most accurate beginner-level explanation of linked lists? (variation 72)

37. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

38. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

39. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

40. When working with Data Structures & Algorithms, why would a developer use binary trees?

41. What is the most accurate beginner-level explanation of linked lists?

42. Which statement best describes Big O notation in Data Structures & Algorithms?

43. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

44. What is the most accurate beginner-level explanation of linked lists? (variation 82)

45. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

46. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

47. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

49. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

51. What is the most accurate beginner-level explanation of linked lists? (variation 72)

52. What is the most accurate beginner-level explanation of linked lists? (variation 102)

53. What is the most accurate beginner-level explanation of recursion? (variation 77)

54. When working with Data Structures & Algorithms, why would a developer use binary search?

55. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

56. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

57. What is the most accurate beginner-level explanation of recursion? (variation 87)

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

59. What is the most accurate beginner-level explanation of recursion?

60. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
