IIT-JEE Previous Year Practice 2026 (2026)

Subject: General | Topic: Operating Systems

1. Which statement best describes processes in Operating Systems? (variation 90)

2. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

3. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

4. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

5. Which statement best describes processes in Operating Systems?

6. Which statement best describes processes in Operating Systems? (variation 350)

7. When working with Operating Systems, why would a developer use system calls? (variation 106)

8. Which option is a correct use case for scheduling in Operating Systems?

9. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

10. When working with Operating Systems, why would a developer use threads? (variation 351)

11. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

12. Which statement best describes processes in Operating Systems? (variation 80)

13. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

14. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

15. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

16. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

17. Which option is a correct use case for virtual memory in Operating Systems?

18. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

19. What is the most accurate beginner-level explanation of context switching? (variation 82)

20. What is the most accurate beginner-level explanation of context switching? (variation 352)

21. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

22. When working with Operating Systems, why would a developer use threads? (variation 101)

23. When working with Operating Systems, why would a developer use threads? (variation 71)

24. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

25. What is the most accurate beginner-level explanation of context switching?

26. When working with Operating Systems, why would a developer use threads?

27. Which statement best describes file systems in Operating Systems?

28. Which statement best describes file systems in Operating Systems? (variation 95)

29. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

30. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

31. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

32. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

33. What is the most accurate beginner-level explanation of context switching? (variation 92)

34. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

35. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

36. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

37. When working with Operating Systems, why would a developer use system calls? (variation 76)

38. Which statement best describes file systems in Operating Systems? (variation 355)

39. A student says 'paging' is not relevant to real projects. What is the best correction?

40. Which statement best describes file systems in Operating Systems? (variation 75)

41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

42. Which statement best describes file systems in Operating Systems? (variation 85)

43. When working with Operating Systems, why would a developer use threads? (variation 81)

44. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

45. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

46. When working with Operating Systems, why would a developer use system calls?

47. When working with Operating Systems, why would a developer use threads? (variation 91)

48. What is the most accurate beginner-level explanation of context switching? (variation 102)

49. When working with Operating Systems, why would a developer use system calls? (variation 96)

50. What is the most accurate beginner-level explanation of context switching? (variation 72)

51. Which statement best describes processes in Operating Systems? (variation 70)

52. A student says 'mutexes' is not relevant to real projects. What is the best correction?

53. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

54. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

55. What is the most accurate beginner-level explanation of deadlocks?

56. Which statement best describes processes in Operating Systems? (variation 100)

57. When working with Operating Systems, why would a developer use system calls? (variation 356)

58. Which statement best describes file systems in Operating Systems? (variation 105)

59. When working with Operating Systems, why would a developer use system calls? (variation 86)

60. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
