IIT-JEE Previous Year Practice 2019 (2019)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of context switching? (variation 72)

2. When working with Operating Systems, why would a developer use threads? (variation 81)

3. A student says 'paging' is not relevant to real projects. What is the best correction?

4. When working with Operating Systems, why would a developer use system calls?

5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

6. When working with Operating Systems, why would a developer use threads?

7. Which statement best describes processes in Operating Systems? (variation 350)

8. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

9. What is the most accurate beginner-level explanation of context switching? (variation 352)

10. Which statement best describes processes in Operating Systems? (variation 90)

11. When working with Operating Systems, why would a developer use system calls? (variation 76)

12. Which option is a correct use case for virtual memory in Operating Systems?

13. When working with Operating Systems, why would a developer use system calls? (variation 96)

14. A student says 'mutexes' is not relevant to real projects. What is the best correction?

15. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

16. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

17. What is the most accurate beginner-level explanation of deadlocks?

18. What is the most accurate beginner-level explanation of context switching? (variation 82)

19. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

20. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

21. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

22. Which statement best describes file systems in Operating Systems? (variation 105)

23. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

24. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

25. When working with Operating Systems, why would a developer use system calls? (variation 86)

26. Which statement best describes processes in Operating Systems? (variation 80)

27. Which option is a correct use case for scheduling in Operating Systems?

28. When working with Operating Systems, why would a developer use system calls? (variation 106)

29. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

30. When working with Operating Systems, why would a developer use threads? (variation 351)

31. What is the most accurate beginner-level explanation of context switching? (variation 102)

32. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

33. Which statement best describes file systems in Operating Systems? (variation 75)

34. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

35. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

36. Which statement best describes file systems in Operating Systems? (variation 85)

37. When working with Operating Systems, why would a developer use system calls? (variation 356)

38. Which statement best describes file systems in Operating Systems? (variation 95)

39. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

40. What is the most accurate beginner-level explanation of context switching?

41. Which statement best describes file systems in Operating Systems?

42. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

43. Which statement best describes processes in Operating Systems?

44. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

45. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

46. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

48. When working with Operating Systems, why would a developer use threads? (variation 101)

49. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

50. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

51. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

52. Which statement best describes file systems in Operating Systems? (variation 355)

53. Which statement best describes processes in Operating Systems? (variation 100)

54. When working with Operating Systems, why would a developer use threads? (variation 71)

55. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

56. When working with Operating Systems, why would a developer use threads? (variation 91)

57. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

58. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

59. What is the most accurate beginner-level explanation of context switching? (variation 92)

60. Which statement best describes processes in Operating Systems? (variation 70)
