CBSE Previous Year Practice 2022 (2022)

Subject: General | Topic: C Programming

1. Which statement best describes the stack in C Programming? (variation 85)

2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

3. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

4. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

5. Which statement best describes pointers in C Programming?

6. What is the most accurate beginner-level explanation of pass by pointer?

7. Which option is a correct use case for structs in C Programming?

8. A student says 'header files' is not relevant to real projects. What is the best correction?

9. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

10. Which option is a correct use case for structs in C Programming? (variation 103)

11. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

12. Which option is a correct use case for structs in C Programming? (variation 93)

13. Which option is a correct use case for structs in C Programming? (variation 73)

14. Which statement best describes the stack in C Programming? (variation 75)

15. Which statement best describes pointers in C Programming? (variation 90)

16. What is the most accurate beginner-level explanation of malloc? (variation 352)

17. Which statement best describes the stack in C Programming?

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

19. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

21. When working with C Programming, why would a developer use arrays? (variation 81)

22. Which statement best describes the stack in C Programming? (variation 105)

23. When working with C Programming, why would a developer use null terminator?

24. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

25. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

26. When working with C Programming, why would a developer use null terminator? (variation 76)

27. What is the most accurate beginner-level explanation of malloc? (variation 72)

28. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

29. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

30. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

32. When working with C Programming, why would a developer use arrays? (variation 71)

33. When working with C Programming, why would a developer use null terminator? (variation 106)

34. When working with C Programming, why would a developer use null terminator? (variation 356)

35. When working with C Programming, why would a developer use arrays?

36. Which statement best describes pointers in C Programming? (variation 350)

37. Which option is a correct use case for preprocessor macros in C Programming?

38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

39. When working with C Programming, why would a developer use arrays? (variation 351)

40. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

41. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

42. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

43. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

44. Which statement best describes pointers in C Programming? (variation 100)

45. When working with C Programming, why would a developer use null terminator? (variation 86)

46. When working with C Programming, why would a developer use arrays? (variation 101)

47. What is the most accurate beginner-level explanation of malloc? (variation 82)

48. Which statement best describes the stack in C Programming? (variation 95)

49. What is the most accurate beginner-level explanation of malloc? (variation 92)

50. Which statement best describes pointers in C Programming? (variation 80)

51. When working with C Programming, why would a developer use arrays? (variation 91)

52. Which statement best describes pointers in C Programming? (variation 70)

53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

54. What is the most accurate beginner-level explanation of malloc?

55. Which statement best describes the stack in C Programming? (variation 355)

56. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

57. Which option is a correct use case for structs in C Programming? (variation 83)

58. When working with C Programming, why would a developer use null terminator? (variation 96)

59. Which option is a correct use case for structs in C Programming? (variation 353)

60. What is the most accurate beginner-level explanation of malloc? (variation 102)
