IIT-JEE Previous Year Practice 2018 (2018)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

2. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

3. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

4. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

5. Which statement best describes hash tables in Data Structures & Algorithms?

6. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

7. When working with Data Structures & Algorithms, why would a developer use binary search?

8. Which option is a correct use case for merge sort in Data Structures & Algorithms?

9. When working with Data Structures & Algorithms, why would a developer use binary search?

10. What is the most accurate beginner-level explanation of recursion? (variation 77)

11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

13. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

14. What is the most accurate beginner-level explanation of recursion? (variation 107)

15. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

16. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

17. What is the most accurate beginner-level explanation of linked lists? (variation 92)

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

19. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

20. What is the most accurate beginner-level explanation of recursion? (variation 87)

21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

22. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

23. What is the most accurate beginner-level explanation of linked lists? (variation 72)

24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

25. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

26. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

29. What is the most accurate beginner-level explanation of recursion?

30. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

31. Which statement best describes hash tables in Data Structures & Algorithms?

32. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

35. What is the most accurate beginner-level explanation of linked lists? (variation 82)

36. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

37. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

38. What is the most accurate beginner-level explanation of linked lists? (variation 102)

39. What is the most accurate beginner-level explanation of recursion? (variation 97)

40. A student says 'queues' is not relevant to real projects. What is the best correction?

41. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

42. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

43. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

44. When working with Data Structures & Algorithms, why would a developer use binary search?

45. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

46. Which option is a correct use case for stacks in Data Structures & Algorithms?

47. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

48. Which statement best describes hash tables in Data Structures & Algorithms?

49. What is the most accurate beginner-level explanation of linked lists? (variation 92)

50. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

51. When working with Data Structures & Algorithms, why would a developer use binary trees?

52. What is the most accurate beginner-level explanation of linked lists? (variation 72)

53. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

54. When working with Data Structures & Algorithms, why would a developer use binary trees?

55. What is the most accurate beginner-level explanation of recursion? (variation 97)

56. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

57. What is the most accurate beginner-level explanation of recursion?

58. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

59. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

60. What is the most accurate beginner-level explanation of linked lists?
