State Board Previous Year Practice 2018 (2018)

Subject: General | Topic: Computer Networks

1. When working with Computer Networks, why would a developer use routing? (variation 96)

2. What is the most accurate beginner-level explanation of TCP? (variation 352)

3. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 104)

4. Which statement best describes HTTP in Computer Networks?

5. Which option is a correct use case for latency in Computer Networks?

6. Which statement best describes IP addresses in Computer Networks? (variation 70)

7. Which statement best describes HTTP in Computer Networks? (variation 95)

8. When working with Computer Networks, why would a developer use subnets? (variation 101)

9. Which statement best describes HTTP in Computer Networks? (variation 75)

10. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 99)

11. Which option is a correct use case for UDP in Computer Networks? (variation 353)

12. Which option is a correct use case for UDP in Computer Networks? (variation 93)

13. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 94)

14. Which option is a correct use case for UDP in Computer Networks?

15. What is the most accurate beginner-level explanation of TCP?

16. Which statement best describes HTTP in Computer Networks? (variation 85)

17. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 84)

18. What is the most accurate beginner-level explanation of switches? (variation 97)

19. Which option is a correct use case for UDP in Computer Networks? (variation 73)

20. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 89)

21. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 359)

22. What is the most accurate beginner-level explanation of TCP? (variation 82)

23. When working with Computer Networks, why would a developer use subnets? (variation 71)

24. A student says 'DNS' is not relevant to real projects. What is the best correction?

25. Which statement best describes HTTP in Computer Networks? (variation 355)

26. What is the most accurate beginner-level explanation of TCP? (variation 72)

27. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 74)

28. When working with Computer Networks, why would a developer use subnets?

29. What is the most accurate beginner-level explanation of switches? (variation 77)

30. What is the most accurate beginner-level explanation of switches? (variation 357)

31. When working with Computer Networks, why would a developer use routing? (variation 106)

32. Which option is a correct use case for latency in Computer Networks? (variation 108)

33. Which statement best describes IP addresses in Computer Networks? (variation 100)

34. When working with Computer Networks, why would a developer use subnets? (variation 81)

35. Which statement best describes IP addresses in Computer Networks? (variation 80)

36. Which option is a correct use case for UDP in Computer Networks? (variation 103)

37. Which option is a correct use case for latency in Computer Networks? (variation 98)

38. Which statement best describes IP addresses in Computer Networks? (variation 350)

39. Which statement best describes IP addresses in Computer Networks? (variation 90)

40. When working with Computer Networks, why would a developer use subnets? (variation 91)

41. What is the most accurate beginner-level explanation of switches?

42. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 79)

43. When working with Computer Networks, why would a developer use routing? (variation 86)

44. Which option is a correct use case for latency in Computer Networks? (variation 88)

45. What is the most accurate beginner-level explanation of switches? (variation 87)

46. Which option is a correct use case for UDP in Computer Networks? (variation 83)

47. What is the most accurate beginner-level explanation of TCP? (variation 92)

48. When working with Computer Networks, why would a developer use routing? (variation 76)

49. When working with Computer Networks, why would a developer use routing?

50. When working with Computer Networks, why would a developer use subnets? (variation 351)

51. Which statement best describes HTTP in Computer Networks? (variation 105)

52. A student says 'ports' is not relevant to real projects. What is the best correction?

53. Which statement best describes IP addresses in Computer Networks?

54. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 109)

55. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 354)

56. When working with Computer Networks, why would a developer use routing? (variation 356)

57. Which option is a correct use case for latency in Computer Networks? (variation 358)

58. Which option is a correct use case for latency in Computer Networks? (variation 78)

59. What is the most accurate beginner-level explanation of TCP? (variation 102)

60. What is the most accurate beginner-level explanation of switches? (variation 107)
