# State Board Previous Year Practice 2019 (2019)

Subject: General | Topic: C Programming

1. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

2. Which statement best describes the stack in C Programming? (variation 355)

3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

5. Which statement best describes pointers in C Programming?

6. Which option is a correct use case for structs in C Programming? (variation 103)

7. What is the most accurate beginner-level explanation of malloc? (variation 352)

8. Which option is a correct use case for structs in C Programming? (variation 83)

9. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

10. When working with C Programming, why would a developer use null terminator? (variation 356)

11. Which option is a correct use case for preprocessor macros in C Programming?

12. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

13. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

14. Which statement best describes the stack in C Programming? (variation 105)

15. When working with C Programming, why would a developer use null terminator? (variation 106)

16. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

17. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

19. Which option is a correct use case for structs in C Programming?

20. Which option is a correct use case for structs in C Programming? (variation 353)

21. Which statement best describes the stack in C Programming? (variation 95)

22. Which statement best describes the stack in C Programming? (variation 85)

23. When working with C Programming, why would a developer use null terminator? (variation 96)

24. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

25. What is the most accurate beginner-level explanation of malloc? (variation 102)

26. Which statement best describes the stack in C Programming?

27. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

28. When working with C Programming, why would a developer use null terminator? (variation 76)

29. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

30. When working with C Programming, why would a developer use arrays? (variation 91)

31. Which statement best describes the stack in C Programming? (variation 75)

32. When working with C Programming, why would a developer use arrays? (variation 101)

33. When working with C Programming, why would a developer use arrays? (variation 351)

34. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

35. What is the most accurate beginner-level explanation of malloc? (variation 92)

36. What is the most accurate beginner-level explanation of malloc? (variation 82)

37. What is the most accurate beginner-level explanation of malloc?

38. When working with C Programming, why would a developer use null terminator? (variation 86)

39. What is the most accurate beginner-level explanation of malloc? (variation 72)

40. Which option is a correct use case for structs in C Programming? (variation 73)

41. What is the most accurate beginner-level explanation of pass by pointer?

42. Which statement best describes pointers in C Programming? (variation 100)

43. Which statement best describes pointers in C Programming? (variation 90)

44. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

45. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

46. Which statement best describes pointers in C Programming? (variation 80)

47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

49. Which option is a correct use case for structs in C Programming? (variation 93)

50. When working with C Programming, why would a developer use null terminator?

51. When working with C Programming, why would a developer use arrays?

52. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

53. When working with C Programming, why would a developer use arrays? (variation 71)

54. Which statement best describes pointers in C Programming? (variation 350)

55. When working with C Programming, why would a developer use arrays? (variation 81)

56. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

57. Which statement best describes pointers in C Programming? (variation 70)

58. A student says 'header files' is not relevant to real projects. What is the best correction?

59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
