NEET Previous Year Practice 2020 (2020)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

2. When working with C Programming, why would a developer use null terminator? (variation 106)

3. When working with C Programming, why would a developer use arrays? (variation 351)

4. What is the most accurate beginner-level explanation of malloc?

5. When working with C Programming, why would a developer use null terminator?

6. Which option is a correct use case for structs in C Programming? (variation 73)

7. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

8. Which statement best describes the stack in C Programming? (variation 105)

9. When working with C Programming, why would a developer use arrays? (variation 81)

10. Which option is a correct use case for structs in C Programming?

11. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

12. Which statement best describes pointers in C Programming? (variation 80)

13. What is the most accurate beginner-level explanation of malloc? (variation 102)

14. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

15. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

16. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

17. Which option is a correct use case for preprocessor macros in C Programming?

18. When working with C Programming, why would a developer use null terminator? (variation 76)

19. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

20. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

21. A student says 'header files' is not relevant to real projects. What is the best correction?

22. When working with C Programming, why would a developer use arrays?

23. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

24. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

25. Which statement best describes pointers in C Programming? (variation 70)

26. Which statement best describes pointers in C Programming? (variation 90)

27. When working with C Programming, why would a developer use null terminator? (variation 96)

28. Which statement best describes pointers in C Programming? (variation 100)

29. When working with C Programming, why would a developer use arrays? (variation 101)

30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

31. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

32. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

33. When working with C Programming, why would a developer use arrays? (variation 71)

34. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

35. Which option is a correct use case for structs in C Programming? (variation 93)

36. Which statement best describes the stack in C Programming? (variation 355)

37. Which option is a correct use case for structs in C Programming? (variation 103)

38. When working with C Programming, why would a developer use null terminator? (variation 356)

39. Which statement best describes the stack in C Programming? (variation 95)

40. Which statement best describes the stack in C Programming? (variation 75)

41. Which statement best describes pointers in C Programming?

42. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

43. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

44. When working with C Programming, why would a developer use null terminator? (variation 86)

45. What is the most accurate beginner-level explanation of malloc? (variation 72)

46. What is the most accurate beginner-level explanation of malloc? (variation 352)

47. Which statement best describes the stack in C Programming? (variation 85)

48. Which option is a correct use case for structs in C Programming? (variation 353)

49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

50. Which option is a correct use case for structs in C Programming? (variation 83)

51. What is the most accurate beginner-level explanation of pass by pointer?

52. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

54. When working with C Programming, why would a developer use arrays? (variation 91)

55. Which statement best describes pointers in C Programming? (variation 350)

56. What is the most accurate beginner-level explanation of malloc? (variation 82)

57. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

58. What is the most accurate beginner-level explanation of malloc? (variation 92)

59. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

60. Which statement best describes the stack in C Programming?
