ICSE Previous Year Practice 2023 (2023)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

2. When working with C Programming, why would a developer use arrays? (variation 91)

3. Which option is a correct use case for preprocessor macros in C Programming?

4. Which statement best describes pointers in C Programming? (variation 90)

5. Which statement best describes pointers in C Programming? (variation 80)

6. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

7. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

8. Which statement best describes the stack in C Programming? (variation 75)

9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

10. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

11. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

12. What is the most accurate beginner-level explanation of malloc? (variation 102)

13. What is the most accurate beginner-level explanation of malloc? (variation 92)

14. Which statement best describes pointers in C Programming? (variation 70)

15. Which statement best describes the stack in C Programming? (variation 105)

16. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

17. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

18. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

20. A student says 'header files' is not relevant to real projects. What is the best correction?

21. Which statement best describes the stack in C Programming? (variation 85)

22. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

23. Which statement best describes the stack in C Programming?

24. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

25. When working with C Programming, why would a developer use null terminator? (variation 86)

26. When working with C Programming, why would a developer use arrays?

27. Which statement best describes the stack in C Programming? (variation 95)

28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

29. When working with C Programming, why would a developer use arrays? (variation 101)

30. When working with C Programming, why would a developer use null terminator? (variation 106)

31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

32. What is the most accurate beginner-level explanation of malloc?

33. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

34. When working with C Programming, why would a developer use arrays? (variation 71)

35. What is the most accurate beginner-level explanation of malloc? (variation 352)

36. Which option is a correct use case for structs in C Programming? (variation 83)

37. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

38. Which statement best describes pointers in C Programming?

39. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

40. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

41. When working with C Programming, why would a developer use null terminator?

42. When working with C Programming, why would a developer use null terminator? (variation 76)

43. Which option is a correct use case for structs in C Programming? (variation 73)

44. Which option is a correct use case for structs in C Programming?

45. What is the most accurate beginner-level explanation of pass by pointer?

46. Which statement best describes pointers in C Programming? (variation 350)

47. Which option is a correct use case for structs in C Programming? (variation 93)

48. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

49. Which option is a correct use case for structs in C Programming? (variation 353)

50. What is the most accurate beginner-level explanation of malloc? (variation 82)

51. What is the most accurate beginner-level explanation of malloc? (variation 72)

52. Which option is a correct use case for structs in C Programming? (variation 103)

53. When working with C Programming, why would a developer use null terminator? (variation 356)

54. When working with C Programming, why would a developer use null terminator? (variation 96)

55. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

56. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

57. When working with C Programming, why would a developer use arrays? (variation 81)

58. When working with C Programming, why would a developer use arrays? (variation 351)

59. Which statement best describes the stack in C Programming? (variation 355)

60. Which statement best describes pointers in C Programming? (variation 100)
