IIT-JEE Previous Year Practice 2024 (2024)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use threads? (variation 351)

2. When working with Operating Systems, why would a developer use threads? (variation 101)

3. Which statement best describes file systems in Operating Systems? (variation 355)

4. A student says 'mutexes' is not relevant to real projects. What is the best correction?

5. Which statement best describes file systems in Operating Systems? (variation 95)

6. When working with Operating Systems, why would a developer use threads? (variation 91)

7. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

8. Which statement best describes processes in Operating Systems? (variation 350)

9. What is the most accurate beginner-level explanation of context switching? (variation 82)

10. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

11. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

12. Which statement best describes processes in Operating Systems? (variation 90)

13. When working with Operating Systems, why would a developer use threads? (variation 81)

14. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

15. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

16. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

17. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

18. When working with Operating Systems, why would a developer use system calls? (variation 106)

19. What is the most accurate beginner-level explanation of context switching?

20. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

21. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

22. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

23. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

24. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

25. What is the most accurate beginner-level explanation of deadlocks?

26. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

27. Which statement best describes file systems in Operating Systems? (variation 85)

28. What is the most accurate beginner-level explanation of context switching? (variation 352)

29. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

30. What is the most accurate beginner-level explanation of context switching? (variation 92)

31. Which statement best describes processes in Operating Systems? (variation 70)

32. What is the most accurate beginner-level explanation of context switching? (variation 72)

33. When working with Operating Systems, why would a developer use system calls? (variation 356)

34. A student says 'paging' is not relevant to real projects. What is the best correction?

35. Which statement best describes processes in Operating Systems?

36. Which statement best describes processes in Operating Systems? (variation 100)

37. Which statement best describes file systems in Operating Systems?

38. When working with Operating Systems, why would a developer use system calls? (variation 96)

39. Which statement best describes file systems in Operating Systems? (variation 75)

40. When working with Operating Systems, why would a developer use system calls?

41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

42. Which option is a correct use case for scheduling in Operating Systems?

43. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

44. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

45. What is the most accurate beginner-level explanation of context switching? (variation 102)

46. Which statement best describes file systems in Operating Systems? (variation 105)

47. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

48. Which option is a correct use case for virtual memory in Operating Systems?

49. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

50. When working with Operating Systems, why would a developer use system calls? (variation 86)

51. Which statement best describes processes in Operating Systems? (variation 80)

52. When working with Operating Systems, why would a developer use system calls? (variation 76)

53. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

54. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

55. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

56. When working with Operating Systems, why would a developer use threads? (variation 71)

57. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

58. When working with Operating Systems, why would a developer use threads?

59. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

60. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
