State Board Previous Year Practice 2026 (2026)

Subject: General | Topic: Python Programming

1. Which statement best describes list comprehensions in Python Programming?

2. When working with Python Programming, why would a developer use dictionaries?

3. What is the most accurate beginner-level explanation of function parameters?

4. Which option is a correct use case for classes in Python Programming?

5. A student says 'exceptions' is not relevant to real projects. What is the best correction?

6. Which statement best describes modules in Python Programming?

7. When working with Python Programming, why would a developer use virtual environments?

8. What is the most accurate beginner-level explanation of iterators?

9. Which option is a correct use case for decorators in Python Programming?

10. A student says 'file handling' is not relevant to real projects. What is the best correction?

11. Which statement best describes classes in Java Programming?

12. When working with Java Programming, why would a developer use interfaces?

13. What is the most accurate beginner-level explanation of inheritance?

14. Which option is a correct use case for ArrayList in Java Programming?

15. A student says 'HashMap' is not relevant to real projects. What is the best correction?

16. Which statement best describes checked exceptions in Java Programming?

17. When working with Java Programming, why would a developer use JVM bytecode?

18. What is the most accurate beginner-level explanation of access modifiers?

19. Which option is a correct use case for generics in Java Programming?

20. A student says 'static members' is not relevant to real projects. What is the best correction?

21. Which statement best describes pointers in C Programming?

22. When working with C Programming, why would a developer use arrays?

23. What is the most accurate beginner-level explanation of malloc?

24. Which option is a correct use case for structs in C Programming?

25. A student says 'header files' is not relevant to real projects. What is the best correction?

26. Which statement best describes the stack in C Programming?

27. When working with C Programming, why would a developer use null terminator?

28. What is the most accurate beginner-level explanation of pass by pointer?

29. Which option is a correct use case for preprocessor macros in C Programming?

30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

31. Which statement best describes Big O notation in Data Structures & Algorithms?

32. When working with Data Structures & Algorithms, why would a developer use binary search?

33. What is the most accurate beginner-level explanation of linked lists?

34. Which option is a correct use case for stacks in Data Structures & Algorithms?

35. A student says 'queues' is not relevant to real projects. What is the best correction?

36. Which statement best describes hash tables in Data Structures & Algorithms?

37. When working with Data Structures & Algorithms, why would a developer use binary trees?

38. What is the most accurate beginner-level explanation of recursion?

39. Which option is a correct use case for merge sort in Data Structures & Algorithms?

40. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

41. Which statement best describes SELECT in SQL Database?

42. When working with SQL Database, why would a developer use WHERE?

43. What is the most accurate beginner-level explanation of INNER JOIN?

44. Which option is a correct use case for LEFT JOIN in SQL Database?

45. A student says 'indexes' is not relevant to real projects. What is the best correction?

46. Which statement best describes primary keys in SQL Database?

47. When working with SQL Database, why would a developer use foreign keys?

48. What is the most accurate beginner-level explanation of normalization?

49. Which option is a correct use case for transactions in SQL Database?

50. A student says 'GROUP BY' is not relevant to real projects. What is the best correction?
