University Exams Previous Year Practice 2023 (2023)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion? (variation 97)

2. When working with Data Structures & Algorithms, why would a developer use binary search?

3. What is the most accurate beginner-level explanation of linked lists? (variation 102)

4. What is the most accurate beginner-level explanation of linked lists? (variation 82)

5. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

6. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

7. Which statement best describes Big O notation in Data Structures & Algorithms?

8. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

9. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

10. What is the most accurate beginner-level explanation of linked lists?

11. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

12. What is the most accurate beginner-level explanation of linked lists? (variation 72)

13. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

14. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

15. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

18. What is the most accurate beginner-level explanation of recursion? (variation 97)

19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

22. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

23. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

24. Which option is a correct use case for merge sort in Data Structures & Algorithms?

25. What is the most accurate beginner-level explanation of linked lists?

26. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

27. Which statement best describes hash tables in Data Structures & Algorithms?

28. Which option is a correct use case for stacks in Data Structures & Algorithms?

29. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

31. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

32. When working with Data Structures & Algorithms, why would a developer use binary search?

33. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

35. When working with Data Structures & Algorithms, why would a developer use binary search?

36. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

37. When working with Data Structures & Algorithms, why would a developer use binary trees?

38. What is the most accurate beginner-level explanation of recursion? (variation 87)

39. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

41. A student says 'queues' is not relevant to real projects. What is the best correction?

42. Which statement best describes Big O notation in Data Structures & Algorithms?

43. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

44. What is the most accurate beginner-level explanation of linked lists? (variation 82)

45. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

46. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

47. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

49. What is the most accurate beginner-level explanation of recursion?

50. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

51. Which statement best describes hash tables in Data Structures & Algorithms?

52. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

53. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

54. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

55. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

56. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

57. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

58. What is the most accurate beginner-level explanation of recursion?

59. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

60. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
