State Board Previous Year Practice 2021 (2021)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use system calls? (variation 356)

2. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

3. What is the most accurate beginner-level explanation of context switching? (variation 352)

4. What is the most accurate beginner-level explanation of context switching? (variation 92)

5. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

6. When working with Operating Systems, why would a developer use system calls? (variation 106)

7. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

8. When working with Operating Systems, why would a developer use threads?

9. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

10. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

11. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

12. What is the most accurate beginner-level explanation of context switching?

13. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

14. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

15. What is the most accurate beginner-level explanation of deadlocks?

16. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

17. Which statement best describes file systems in Operating Systems? (variation 355)

18. What is the most accurate beginner-level explanation of context switching? (variation 102)

19. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

20. A student says 'mutexes' is not relevant to real projects. What is the best correction?

21. Which statement best describes file systems in Operating Systems? (variation 85)

22. Which statement best describes processes in Operating Systems?

23. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

24. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

25. When working with Operating Systems, why would a developer use system calls?

26. When working with Operating Systems, why would a developer use threads? (variation 91)

27. Which statement best describes processes in Operating Systems? (variation 80)

28. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

29. When working with Operating Systems, why would a developer use system calls? (variation 76)

30. Which statement best describes file systems in Operating Systems?

31. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

32. Which statement best describes processes in Operating Systems? (variation 90)

33. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

34. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

35. What is the most accurate beginner-level explanation of context switching? (variation 72)

36. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

37. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

38. What is the most accurate beginner-level explanation of context switching? (variation 82)

39. When working with Operating Systems, why would a developer use threads? (variation 101)

40. When working with Operating Systems, why would a developer use system calls? (variation 86)

41. A student says 'paging' is not relevant to real projects. What is the best correction?

42. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

43. Which option is a correct use case for scheduling in Operating Systems?

44. Which statement best describes file systems in Operating Systems? (variation 105)

45. When working with Operating Systems, why would a developer use threads? (variation 81)

46. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

47. Which statement best describes file systems in Operating Systems? (variation 95)

48. When working with Operating Systems, why would a developer use system calls? (variation 96)

49. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

50. When working with Operating Systems, why would a developer use threads? (variation 351)

51. Which statement best describes processes in Operating Systems? (variation 350)

52. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

53. Which statement best describes processes in Operating Systems? (variation 70)

54. When working with Operating Systems, why would a developer use threads? (variation 71)

55. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

56. Which statement best describes file systems in Operating Systems? (variation 75)

57. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

58. Which statement best describes processes in Operating Systems? (variation 100)

59. Which option is a correct use case for virtual memory in Operating Systems?

60. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
