IIT-JEE Previous Year Practice 2026 (2026)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 82)

2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

3. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

4. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

5. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

6. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

7. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

8. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

10. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

11. What is the most accurate beginner-level explanation of recursion? (variation 97)

12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

13. Which option is a correct use case for stacks in Data Structures & Algorithms?

14. Which option is a correct use case for merge sort in Data Structures & Algorithms?

15. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

16. What is the most accurate beginner-level explanation of linked lists? (variation 92)

17. A student says 'queues' is not relevant to real projects. What is the best correction?

18. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

19. What is the most accurate beginner-level explanation of linked lists? (variation 102)

20. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

21. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

22. Which statement best describes hash tables in Data Structures & Algorithms?

23. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

24. What is the most accurate beginner-level explanation of recursion? (variation 87)

25. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

27. What is the most accurate beginner-level explanation of linked lists?

28. What is the most accurate beginner-level explanation of linked lists?

29. What is the most accurate beginner-level explanation of linked lists? (variation 82)

30. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

31. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

32. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

34. What is the most accurate beginner-level explanation of linked lists? (variation 92)

35. When working with Data Structures & Algorithms, why would a developer use binary search?

36. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

37. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

39. When working with Data Structures & Algorithms, why would a developer use binary search?

40. Which statement best describes Big O notation in Data Structures & Algorithms?

41. What is the most accurate beginner-level explanation of recursion?

42. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

43. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

44. What is the most accurate beginner-level explanation of linked lists? (variation 92)

45. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

46. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

47. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

51. What is the most accurate beginner-level explanation of linked lists? (variation 102)

52. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

54. Which option is a correct use case for merge sort in Data Structures & Algorithms?

55. When working with Data Structures & Algorithms, why would a developer use binary trees?

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

57. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

58. What is the most accurate beginner-level explanation of recursion?

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

60. Which statement best describes hash tables in Data Structures & Algorithms?
