State Board Previous Year Practice 2022 (2022)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

2. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

3. Which statement best describes hash tables in Data Structures & Algorithms?

4. Which statement best describes hash tables in Data Structures & Algorithms?

5. When working with Data Structures & Algorithms, why would a developer use binary trees?

6. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

8. What is the most accurate beginner-level explanation of recursion? (variation 87)

9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

10. Which statement best describes Big O notation in Data Structures & Algorithms?

11. What is the most accurate beginner-level explanation of linked lists? (variation 102)

12. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

13. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

14. What is the most accurate beginner-level explanation of linked lists? (variation 102)

15. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

16. When working with Data Structures & Algorithms, why would a developer use binary search?

17. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

18. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

19. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

20. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

21. A student says 'queues' is not relevant to real projects. What is the best correction?

22. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

24. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

25. When working with Data Structures & Algorithms, why would a developer use binary search?

26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

31. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

32. When working with Data Structures & Algorithms, why would a developer use binary search?

33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

34. What is the most accurate beginner-level explanation of linked lists?

35. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

37. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

38. What is the most accurate beginner-level explanation of linked lists? (variation 102)

39. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

40. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

41. What is the most accurate beginner-level explanation of recursion?

42. What is the most accurate beginner-level explanation of linked lists? (variation 92)

43. What is the most accurate beginner-level explanation of recursion? (variation 107)

44. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

45. What is the most accurate beginner-level explanation of recursion? (variation 97)

46. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

47. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

49. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

51. What is the most accurate beginner-level explanation of recursion? (variation 77)

52. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

55. What is the most accurate beginner-level explanation of linked lists? (variation 92)

56. What is the most accurate beginner-level explanation of linked lists? (variation 72)

57. Which option is a correct use case for stacks in Data Structures & Algorithms?

58. What is the most accurate beginner-level explanation of linked lists? (variation 92)

59. What is the most accurate beginner-level explanation of recursion? (variation 97)

60. What is the most accurate beginner-level explanation of linked lists?
