ICSE Previous Year Practice 2019 (2019)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion? (variation 107)

2. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

3. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

5. What is the most accurate beginner-level explanation of linked lists? (variation 82)

6. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

7. What is the most accurate beginner-level explanation of linked lists?

8. What is the most accurate beginner-level explanation of linked lists? (variation 102)

9. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

10. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

11. What is the most accurate beginner-level explanation of linked lists?

12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

13. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

14. Which statement best describes hash tables in Data Structures & Algorithms?

15. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

16. What is the most accurate beginner-level explanation of linked lists?

17. A student says 'queues' is not relevant to real projects. What is the best correction?

18. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

19. What is the most accurate beginner-level explanation of recursion? (variation 77)

20. Which statement best describes hash tables in Data Structures & Algorithms?

21. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

22. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

24. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

25. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

27. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

28. When working with Data Structures & Algorithms, why would a developer use binary search?

29. What is the most accurate beginner-level explanation of recursion? (variation 87)

30. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

31. What is the most accurate beginner-level explanation of linked lists? (variation 72)

32. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

33. What is the most accurate beginner-level explanation of recursion?

34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

35. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

36. What is the most accurate beginner-level explanation of linked lists? (variation 92)

37. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

38. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

39. Which statement best describes Big O notation in Data Structures & Algorithms?

40. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

41. A student says 'queues' is not relevant to real projects. What is the best correction?

42. When working with Data Structures & Algorithms, why would a developer use binary search?

43. What is the most accurate beginner-level explanation of linked lists? (variation 102)

44. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

45. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

47. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

48. What is the most accurate beginner-level explanation of recursion? (variation 97)

49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

50. What is the most accurate beginner-level explanation of linked lists? (variation 72)

51. When working with Data Structures & Algorithms, why would a developer use binary search?

52. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

54. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

55. What is the most accurate beginner-level explanation of linked lists? (variation 82)

56. Which option is a correct use case for merge sort in Data Structures & Algorithms?

57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

58. When working with Data Structures & Algorithms, why would a developer use binary trees?

59. Which statement best describes hash tables in Data Structures & Algorithms?

60. What is the most accurate beginner-level explanation of linked lists? (variation 102)
