State Board Previous Year Practice 2024 (2024)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

2. Which statement best describes hash tables in Data Structures & Algorithms?

3. When working with Data Structures & Algorithms, why would a developer use binary search?

4. What is the most accurate beginner-level explanation of linked lists? (variation 72)

5. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

6. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

7. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

8. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

9. Which statement best describes Big O notation in Data Structures & Algorithms?

10. Which statement best describes hash tables in Data Structures & Algorithms?

11. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

13. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

14. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

15. What is the most accurate beginner-level explanation of recursion?

16. What is the most accurate beginner-level explanation of linked lists? (variation 82)

17. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

18. What is the most accurate beginner-level explanation of linked lists? (variation 92)

19. Which option is a correct use case for merge sort in Data Structures & Algorithms?

20. What is the most accurate beginner-level explanation of recursion?

21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

22. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

23. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)

24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

25. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

27. When working with Data Structures & Algorithms, why would a developer use binary search?

28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

29. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

30. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

31. Which option is a correct use case for merge sort in Data Structures & Algorithms?

32. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

33. When working with Data Structures & Algorithms, why would a developer use binary trees?

34. What is the most accurate beginner-level explanation of recursion? (variation 87)

35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

36. Which statement best describes hash tables in Data Structures & Algorithms?

37. When working with Data Structures & Algorithms, why would a developer use binary search?

38. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

39. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

40. What is the most accurate beginner-level explanation of recursion? (variation 97)

41. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

42. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

43. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

44. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

46. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

47. What is the most accurate beginner-level explanation of linked lists? (variation 82)

48. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

49. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

50. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

51. When working with Data Structures & Algorithms, why would a developer use binary trees?

52. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

53. What is the most accurate beginner-level explanation of linked lists? (variation 92)

54. What is the most accurate beginner-level explanation of recursion? (variation 77)

55. A student says 'queues' is not relevant to real projects. What is the best correction?

56. What is the most accurate beginner-level explanation of recursion? (variation 97)

57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

58. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

60. What is the most accurate beginner-level explanation of linked lists?
