University Exams Previous Year Practice 2020 (2020)

Subject: General | Topic: C Programming

1. Which statement best describes pointers in C Programming? (variation 350)

2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

3. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

4. What is the most accurate beginner-level explanation of pass by pointer?

5. What is the most accurate beginner-level explanation of malloc? (variation 92)

6. Which option is a correct use case for structs in C Programming? (variation 83)

7. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

8. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

9. When working with C Programming, why would a developer use arrays? (variation 101)

10. A student says 'header files' is not relevant to real projects. What is the best correction?

11. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

12. When working with C Programming, why would a developer use arrays?

13. Which option is a correct use case for preprocessor macros in C Programming?

14. When working with C Programming, why would a developer use null terminator?

15. Which option is a correct use case for structs in C Programming? (variation 353)

16. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

17. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

18. What is the most accurate beginner-level explanation of malloc? (variation 82)

19. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

20. Which statement best describes pointers in C Programming? (variation 90)

21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

22. Which option is a correct use case for structs in C Programming?

23. When working with C Programming, why would a developer use arrays? (variation 71)

24. Which statement best describes the stack in C Programming?

25. When working with C Programming, why would a developer use null terminator? (variation 86)

26. What is the most accurate beginner-level explanation of malloc? (variation 72)

27. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

28. Which statement best describes the stack in C Programming? (variation 85)

29. Which statement best describes the stack in C Programming? (variation 95)

30. Which statement best describes the stack in C Programming? (variation 105)

31. When working with C Programming, why would a developer use null terminator? (variation 76)

32. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

33. Which option is a correct use case for structs in C Programming? (variation 73)

34. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

35. Which statement best describes the stack in C Programming? (variation 75)

36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

37. Which option is a correct use case for structs in C Programming? (variation 93)

38. When working with C Programming, why would a developer use arrays? (variation 91)

39. When working with C Programming, why would a developer use null terminator? (variation 356)

40. When working with C Programming, why would a developer use arrays? (variation 351)

41. Which option is a correct use case for structs in C Programming? (variation 103)

42. What is the most accurate beginner-level explanation of malloc? (variation 102)

43. What is the most accurate beginner-level explanation of malloc?

44. Which statement best describes pointers in C Programming? (variation 100)

45. Which statement best describes pointers in C Programming? (variation 70)

46. Which statement best describes pointers in C Programming? (variation 80)

47. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

48. What is the most accurate beginner-level explanation of malloc? (variation 352)

49. Which statement best describes the stack in C Programming? (variation 355)

50. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

51. When working with C Programming, why would a developer use null terminator? (variation 106)

52. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

54. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

55. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

56. Which statement best describes pointers in C Programming?

57. When working with C Programming, why would a developer use null terminator? (variation 96)

58. When working with C Programming, why would a developer use arrays? (variation 81)

59. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
